**IN THE MATTER OF THE APPLICATION  
OF DEVON ENERGY PRODUCTION COMPANY, L.P.  
FOR A NON-STANDARD SPACING AND PRORATION  
UNIT AND COMPULSORY POOLING,  
EDDY COUNTY, NEW MEXICO.**

CASE NO. 14503

**APPLICATION**

Devon Energy Production Company, L.P., (“Devon”) through its undersigned attorneys, hereby makes application to the Oil Conservation Division pursuant to the provisions of N.M. Stat. Ann. § 70-2-17, for an order: (1) creating a non-standard spacing unit comprised of the W/2 E/2 of Section 16, Township 25 South, Range 29 East, NMPM, which will be the Project Area for the Cooter “16” State Well No. 5H to be horizontally drilled from a surface location 330 feet from the South line and 2310 feet from the East line and a bottomhole location 330 feet from the North line and 2250 feet from the East line in the Bone Spring formation, Undesignated Southeast Willow Lake-Bone Spring Pool and the Cooter “16” State Well No. 6H to be horizontally drilled from a surface location 330 feet from the South line and 1650 feet from the East line and a bottomhole location 330 feet from the North line and 1650 feet from the East line in the Bone Spring formation, Undesignated Southeast Willow Lake-Bone Spring Pool and (2) pooling all mineral interests in the Bone Spring formation in this non-standard spacing and proration unit and in support of its application states:

1. Devon is a working interest owner in the W/2 E/2 of said Section 16 and has the right to drill thereon.

2. Devon proposes to dedicate the above-referenced unit to its:

a. Cooter "16" State Well No. 5H to be drilled as an oil well at a standard surface location 330 feet from the South line and 2310 feet from the East line of said Section 16 and then in a northerly direction in the Bone Spring formation to a bottomhole location 330 feet from the North line and 2250 feet from the East line of said Section 16; and

b. Cooter "16" State Well No. 6H to be drilled as an oil well at a standard location 330 feet from the South line and 1650 feet from the East line of said Section 16 and then in a northerly direction in the Bone Spring formation to a bottomhole location 330 feet from the North line and 1650 feet from the East line of said Section 16.

3. Devon has sought and been unable to obtain a voluntary agreement for the development of these lands from certain interest owners in the subject project area who are identified on Exhibit A to this application.

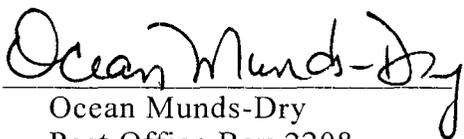

4. Said pooling of interests will avoid the drilling of unnecessary wells, will prevent waste and will protect correlative rights.

5. In order to permit Devon to obtain its just and fair share of the oil and gas underlying the subject lands, all mineral interests should be pooled, and Devon should be designated the operator of the wells to be drilled.

WHEREFORE, Devon Energy Production Company, L.P. requests that this application be set for hearing before an Examiner of the Oil Conservation Division on July 8, 2010 and, after notice and hearing as required by law, the Division enter its order:

- A. creating a non-standard spacing and proration unit in the Bone Spring formation comprised of the W/2 E/2 of Section 16, Township 25 South, Range 29 East, NMPM;
- B. pooling all mineral interests in the subject non-standard spacing and proration unit;
- C. designating Devon Energy Production Company, L.P. operator of this unit and the wells to be drilled thereon,
- D. authorizing Devon Energy Production Company, L.P. to recover its costs of drilling, equipping and completing the wells,
- E. approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures, and
- F. imposing a 200% penalty for the risk assumed by Devon Energy Production Company, L.P. in drilling and completing the wells against any working interest owner who does not voluntarily participate in the drilling of the wells.

Respectfully submitted,  
HOLLAND & HART LLP
