

APPLICATION FOR AUTHORIZATION TO INJECT

Case 14505

I. PURPOSE:  X - EOR Secondary Recovery      Pressure Maintenance      Disposal      Storage  
Application qualifies for administrative approval?       X Yes       No

II. OPERATOR: Celero Energy II, LP

ADDRESS: 400 West Illinois Avenue, Suite 1601, Midland, Texas 79701

CONTACT PARTY: John E. Anderson      PHONE: 817-708-3814

III. WELL DATA: Complete the data required on the reverse side of this form for each well proposed for injection.  
Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project?  X Yes       No  
If yes, give the Division order number authorizing the project: R-1541

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and,
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

EXHIBIT C

\*VIII. Attach appropriate geologic data on the injection zone including appropriate lithologic detail, geologic name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such sources known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

\*X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division, they need not be resubmitted).

\*XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground sources of drinking water.

XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.

XIV. Certification: I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

NAME: John E. Anderson      TITLE: Petroleum Engineer

SIGNATURE: John E. Anderson      DATE: 03-13-09

E-MAIL ADDRESS: janderson@celeroenergy.com

\* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be resubmitted. Please show the date and circumstances of the earlier submittal: \_\_\_\_\_

### III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; Location by Section, Township and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District Offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and the name of the next higher and next lower oil or gas zone in the area of the well, if any.

### XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) The intended purpose of the injection well; with the exact location of single wells or the Section, Township, and Range location of multiple wells;
- (3) The formation name and depth with expected maximum injection rates and pressures; and,
- (4) A notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, 1220 South St. Francis Dr., Santa Fe, New Mexico 87505, within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

---

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

**Well History:** Rock Queen Unit #108

**(09-57) - Initial Completion:** Orig Comp perforated 3060' - 3072' (4 SPF), and frac lease crude and 10,000# sand @ 15.4 BPM and 2400 IP 60 BOPD.

**(12-62) - Converted to Injector:** Converted to water injection. Cleaned hole to TD. Ran pkr. Set pkr @ 3010'.

**(06-85) - TA Well:** Pulled 2 3/8" injection tubing. Left Baker Model AD-1 packer and 8.54' of tailpipe in the wellbore @ 2798'. Left 1 joint of 2 3/8" tubing hung in the tbg head. TA well.

**(06-08) - Workover:** Identified parted 5 1/2" casing @ 2505'. Ran 2 3/8" tubing through parted 5 1/2" casing to 2621'. Spotted 3 sx sand at EOT and let fall. Tagged sand @ 2737'. Lowered 2 3/8" tubing to 2717' and spotted a balanced plug of 50 sx Class C cement w/ additives in 5 1/2" casing. Tagged TOC @ 2580'. Ran and set cmt retainer @ 2482', and pumped 200 sx Class C cement w/ additives. CO/DO cement to top of cmt retainer @ 2482'. Ran and set whipstock assembly @ 2481'. Cut window from 2469' to 2475' and drilled new hole from 2475' to new TD @ 3050'. Ran 4" 9.5# J-55 FJ liner from 3050' - surface, and cemented w/ 400 sx 50/50 pos mix cement w/ additives and 100 sx Class C cement w/ additives. DO cement to new PBTD @ 3049'. Ran CBL, TOC @ 2464'. DO guide shoe at 3052' and DO well to new TD @ 3080'. RIH w/ 2 3/8" 4.7# J-55 IPC injection tubing and Arrowset injection packer. Set packer @ 3006'. Acidized Queen interval (3060' - 3072') w/ 2000 gal 7 1/2% NEFE HCl acid w/ 1000# rock salt in three stages @ 3.2 BPM and 750 psi Avg STP. Returned well to water injection.

**Well History:** Rock Queen Unit #83

**(9-55) - Initial Completion:** Orig comp in open hole 3068'.

**(8-62) - Converted to Injector:** Converted to water injection. Cleaned hole to 3080'. Ran 2-3/8" tbg on pkr to 2995'.

**(7/85) - Workover:** Tite spot in csg @ 2738'. Left HOWCD R-4 pkr and ? Tail pipe in hole @ 2738'. No record this fish was recovered. Tubing was pulled when casing pressure test failed.

**(03-08) - Workover:** POH w/ 2 3/8" IPC injection. Unable to fish injection packer @ 2738' +/-.  
Attempted to mill out casing and injection packer from 2525' to 2800'. Unable to mill up or recover injection packer @ 2800'. Spotted two 30 sx cmt plugs @ 2790' in preparation to sidetrack well. tagged cmt @ 2509'. Ran and set CIBP @ 2415'. Ran whipstock assembly, cut window, and sidetracked well. Drilled new 4 3/4" hole from 2418' to 3137'. Ran 100 jts 4" 9.5# J-55 FJ liner from 3137' to surface and cemented w/ 30 sx thixotropic cmt conventional and 20 sx thixotropic and 50 sx Class C cmt w/ additives down the 4" x 5 1/2" casing annulus. DO cmt and CO well to new PBTD @ 3135'. Ran GR/CCL/CN/CBL logs. TOC @ 3048'. Mixed and pumped 50 sx Class C cmt w/ additives down the 4" x 5 1/2" casing annulus. Ran CBL and found cmt scattered throughout the wellbore. Perforated 4 shots @ 3000'. Set cmt retainer @ 2900' and squeeze cemented perfs @ 3000' w/ 150 sx Class C cmt w/ additives. DO cmt retainer and cmt to new PBTD @ 3135'. Ran CBL and new TOC @ 2985'. Perf 4 shots @ 2960'. Pumped down 4" casing 100 sx thixotropic cmt and 150 sx Class C cmt w/ additives. DO cmt to PBTD @ 3135'. Ran CBL, TOC @ 2930'. Perf 4 shots @ 2695' and pumped 100 sx Class C cmt w/ additives down 4" casing. DO cmt to PBTD @ 3135'. Ran CBL, TOC @ 2750'. Perforated Queen sand interval 3067' - 3080' (13' net, 4 SPF, 52 shots). Ran 2 3/8" 4.7# J-55 IPC injection tubing and 4" Arrowset packer and set packer @ . Acidized Queen interval (3067' - 3080') w/ 2000 gal 7 1/2% NEFE HCl acid w/ 1000# rock salt in two stages @ 3.9 BPM and 200 psi Avg STP. Returned well to water injection.

CURRENT STATUS: Injector

**API = 30-005-00942**

Original Well Name: State U #13

PBTD - 3076'  
TD - 3076'

**Well History:**                   **Rock Queen Unit #95**

**(05-56) - Initial Completion:**      Orig Comp drilled out w/ cable tools to 3076' and well came-in natural.  
Frac'd w/ 3,750 gals oil and 7,500# sand. IP 48 BOPD.

**(02-64) - Converted to Injector:**      Converted to water injection. Cleaned hole to TD. Ran 2-3/8" tbg w/  
pkr. Set pkr @ 2978'.

**(11-07) - Workover:**      Pulled 2 3/8" IPC tubing and injection packer. Could not recover two joints  
of 2 3/8" tailpipe that was left in the wellbore. Tagged 3008' w/ workstring. Checked casing integrity  
to 500 psi @ 2960', OK. Ran 2 3/8" 4.7# J-55 IPC injection tubing and Model AD-1 packer, and set  
packer @ 2975'. Acidized Queen (3073' - 3076') w/ 1950 gal 7 1/2% NEFE acid @ 5.2 BPM and 837  
psi avg STP. Returned well to water injection.
