

APPLICATION FOR AUTHORIZATION TO INJECT

VACUUM DRINKARD

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? Yes No

II. Operator: TEXACO EXPLORATION AND PRODUCTION INC.

Address: P. O. Box 3109, MIDLAND, TX 79702

Contact party: JAMES A. HEAD Phone: (915) 688-4613

III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project? Yes No
If yes, give the Division order number authorizing the project _____.

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

* VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
5. If injection is for disposal purposes into a zone-not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

*VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

* X. Attach appropriate logging and other data with the Division they need in connection with the application.

* XI. Attach a chemical analysis of available and producing) with location of wells and dates of

XII. Applicants for disposal wells examined available geologic as or any other hydrologic connection to a source of drinking water.

XIII. Applicants must complete the

XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: JAMES A. HEAD Title: ASSET MANAGER

Signature: James A. Head Date: 11/1/94

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

III. WELL DATA

- A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:
- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
 - (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
 - (3) A description of the tubing to be used including its size, lining material, and setting depth.
 - (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.
- (1) The name of the injection formation and, if applicable, the field or pool name.
 - (2) The injection interval and whether it is perforated or open-hole.
 - (3) State if the well was drilled for injection or, if not, the original purpose of the well.
 - (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
 - (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

**VACUUM DRINKARD FIELD
PRESSURE MAINTENANCE PROJECT
APPLICATION FOR AUTHORIZATION TO INJECT WATER**

ATTACHMENT III TO FORM C-108

Attached is a description of the eight wells proposed for injection for this project. Six wells are to be drilled for injection while two are existing producers to be converted. Also attached are the completion records of the two wells to be converted as well as their wellbore schematics. For the new wells a typical wellbore schematic is included.

ATTACHMENT V TO FORM C-108

Attached are two maps of the project area. The first shows all wells drilled in the project area within two miles of the proposed injectors which are shown in yellow triangles. The second map shows all wells drilled through to the injection interval. The red circles are one-half mile radius around each proposed injector to identify the area of review.

ATTACHMENT VI TO FORM C-108

Attached is a listing of all wells that have penetrated the injection interval in the area of review of the proposed injectors. Also included are wellbore schematics of the wells.

**ATTACHMENT VII TO FORM C-108
DATA ON PROPOSED OPERATION**

Proposed average and maximum daily rate for the project:

Average Daily Rate:	5000 BWPD (625 BWPD/well)
Maximum Daily Rate:	8000 BWPD (1000 BWPD/well)

The injection system is closed.

The proposed average and maximum* surface injection pressures are:

Average injection pressure	1400 PSIG
Maximum injection pressure	1500 PSIG

* Until a fracture gradient is determined, maximum injection pressure will be based on a 0.2 psi/ft gradient.

The source of injection water will be produced water from the Glorieta and Grayburg-San Andres Formations. This will be supplied from the Vacuum Glorieta West Unit and the Vacuum Grayburg San Andres Unit waterfloods. As shown on the attached water analysis of Drinkard produced water and the above mentioned sources, the waters are compatible.

ATTACHMENT VIII TO FORM C-108

FORMATION DESCRIPTION

The Drinkard formation is a microcrystalline dolomite deposited in a patch reef environment. The structure is a southeasterly dipping stratigraphic trap with permeability pinchouts in all directions.

The Drinkard is in the Paleozoic era, Permian System, Leonard Age and Yeso group.

The top of the Drinkard is found at approximately 7450' to 7600' and is approximately 500 feet thick.

No known faults cut through the Drinkard that may act as conduits for gas, oil, or injection fluids to seep into fresh water aquifers above the injection zone within the proposed injection project. There are water injection projects above the Drinkard in the Paddock (Vacuum Glorieta West Unit) and the Grayburg-San Andres (Vacuum Grayburg-San Andres Unit and Central Vacuum Unit). The productive formation below the Drinkard is the Abo Reef. No contamination of the Ogallala through faults cutting these shallower zones has been observed.

Listed below are the formations and depths of oil productive zones in this area.

Grayburg-San Andres	4300'
Glorieta-Paddock	5900'
Blinberry	6500'
Drinkard	7450'
Abo	8300'
Wolfcamp	9400'
Penn Reef	10000'
Devonian	12000'

ATTACHMENT IX TO FORM C-108

PROPOSED STIMULATION PLAN FOR A TYPICAL INJECTION WELL

All injection wells will be cased hole completions selectively perforated. The stimulation program initially will be medium sized acid jobs using 15% HCL. As the project matures restimulation with larger acid treatments may be required.

ATTACHMENT X TO FORM C-108

WELL LOGS

As the new wells are drilled, logs will be filed with the Division.

Logs on New Mexico "O" NCT-1 No. 36 and New Mexico "R" NCT-3 No. 26 have previously been sent to the Division.

ATTACHMENT XI TO FORM C-108

**CHEMICAL ANALYSIS OF FRESH WATER WITHIN
ONE MILE OF INJECTION WELLS**

The attached map shows the location of two fresh water wells in the vicinity of the proposed pressure maintenance project which have chemical analysis. Attached are the attendant water analyses.

ATTACHMENT XII TO FORM C-108

Texaco has examined available geological and engineering data and finds no evidence of open faults or any other hydrologic connection between the injection zone and any underground source of drinking water.

ATTACHMENT XIII TO FORM C-108

NOTIFICATION OF SURFACE OWNERS AND OPERATORS

Texaco has notified by certified letter the surface owner and offset operators of the intent to inject as well as the drilling of nonstandard locations.

See the attached list of Offset Operators and surface owner.

Attached is a copy of the legal notice and affidavit of publication in the Hobbs Daily News-Sun.

INSTRUCTIONS

This form is to be filed with the appropriate District Office of the Division not later than 20 days after the completion of any newly-drilled or deepened well. It shall be accompanied by one copy of all electrical and radio-activity logs run on the well and a summary of all special tests conducted, including drill stem tests. All depths reported shall be measured depths. In the case of directionally drilled wells, true vertical depths shall also be reported. For multiple completions, Items 25 through 29 shall be reported for each zone. The form is to be filed in quintuplicate except on state land, where six copies are required. See Rule 1105.

OFFSET OPERATORS

REQUEST FOR WATER INJECTION WELLS

VACUUM DRINKARD FIELD
LEA COUNTY, NEW MEXICO

Gentlemen:

It is our intent with Marathon Oil Co. and Shell Oil Co. to drill on nonstandard locations the wells listed below for water injection to implement a pressure maintenance project in the subject field:

New Mexico "R" State NCT-1 Nos. 16 & 17
New Mexico "R" State NCT-3 No. 28
New Mexico "L" State Nos. 16 & 17
Warn State A/C 2 No. 25

In addition, Texaco plans to convert to injection in the same field two wells for pressure maintenance:

New Mexico "R" State NCT-3 No. 26
New Mexico "O" State NCT-1 No. 36

Please find attached Form C-108, Application for Authorization to Inject, and attachments that were submitted to the State of New Mexico.

This information is being supplied to you, as an offset operator, as required by the New Mexico Oil Conservation Division for any operator within one-half mile of any proposed injector.

Your very truly,

J. A. Head
North Hobbs Asset Manager

LEGAL NOTICE
November 3, 1994

Notice is hereby given of the application of Texaco Exploration & Production Inc., Attention: Terry L. Frazier, Area Manager, P.O. Box 730, Hobbs, New Mexico, 88240, Telephone (505) 393-7191, to the New Mexico Oil Conservation Commission, Energy and Minerals Department, for approval to convert two producing wells to water injection and drill six injection wells for the purpose of pressure maintenance. This will be a cooperative project between Texaco E&P Inc., Marathon Oil Co. and Shell Western E&P Inc.

Pool Name: Vacuum Drinkard, Lea County, New Mexico

Texaco E&P Inc.-Conversion Well Numbers and Locations:

NM 'O' State NCT-1 No. 36 - Unit N, 330 FSL & 2210 FWL Sec. 36, T-18S, R-34E

NM 'R' State NCT-3 No. 26 - Unit J, 1980 FSL & 1755 FEL Sec. 1, T-18S, R-34E

Texaco E&P Inc.-New Injection Well Numbers and Locations:

NM 'R' State NCT-3 No. 28 - Unit P, 1310 FSL & 110 FEL Sec. 1, T-18S, R-34E

NM 'R' State NCT-1 No. 17 - Unit G, 2530 FNL & 2530 FEL Sec. 6, T-18S, R-35E

NM 'R' State NCT-1 No. 16 - Unit G, 1410 FNL & 2630 FEL Sec. 6, T-18S, R-35E

NM 'L' State No. 17 - Unit H, 2560 FNL & 10 FEL Sec. 1, T-18S, R-34E

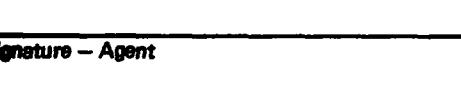

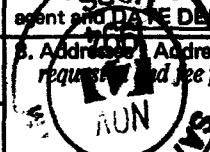

NM 'L' State No. 16 - Unit A, 1310 FNL & 10 FEL Sec. 1, T-18S, R-34E

Marathon Oil Co. - New Injection Well Number and Location:

WARM STATE A/C-2 No. 25 - Unit C, 113 FNL & 1429 FWL Sec. 6, T-18S, R-35E

The injection formation is Vacuum Drinkard at a depth of 7450 feet below the surface of the ground. Expected maximum injection rate is 550 barrels per day, and expected maximum initial injection pressure is 1500 pounds per square inch. Interested parties must file objections or requests for hearing with the Oil Conservation Division, P.O. Box 2088, Santa Fe, New Mexico, 87501, within fifteen (15) days of this publication.

This newspaper is duly qualified to publish legal notices or advertisements within the meaning of Section 3, Chapter 167, Laws of 1937, and payment of fees for said publication has been made.

RESULT OF WATER ANALYSES

TO: Mr. Todd Lackey
P. O. Box 728, Hobbs, NM 88240

LABORATORY NO. 1191105 (Page 5)
SAMPLE RECEIVED 11-12-91
RESULTS REPORTED 11-20-91

COMPANY Texaco Exploration & Production Inc. LEASE Vacuum Area
FIELD OR POOL Vacuum
SECTION BLOCK SURVEY COUNTY Lea STATE NM
SOURCE OF SAMPLE AND DATE TAKEN:
NO. 1 Raw water - taken from Western Ag. Mineral water well #6. 11-12-91
NO. 2 Raw water - taken from Western Ag. Mineral water well #7. 11-12-91
NO. 3 Raw water - taken from Buckeye Gas Plant water supply well. 11-12-91
NO. 4 Raw water - taken from Forklift Enterprises fresh water station. 11-12-91

REMARKS:

CHEMICAL AND PHYSICAL PROPERTIES				
	NO. 1	NO. 2	NO. 3	NO. 4
Specific Gravity at 60° F.	1.0012	1.0011	1.0016	1.0037
pH When Sampled				
pH When Received	7.21	7.33	7.16	7.30
Bicarbonate as HCO ₃	195	200	195	195
Supersaturation as CaCO ₃				
Undersaturation as CaCO ₃				
Total Hardness as CaCO ₃	196	180	248	950
Calcium as Ca	59	58	82	284
Magnesium as Mg	12	9	11	58
Sodium and/or Potassium	25	24	31	615
Sulfate as SO ₄	32	26	25	140
Chloride as Cl	41	30	92	1,406
Iron as Fe	0.11	0.11	0.07	0.11
Barium as Ba				
Turbidity, Electric				
Color as Pt				
Total Solids, Calculated	365	346	436	2,699
Temperature °F.				
Carbon Dioxide, Calculated				
Dissolved Oxygen,				
Hydrogen Sulfide	0.0	0.0	0.0	0.0
Resistivity, ohms/m at 77° F.	23.50	25.70	17.15	2.18
Suspended Oil				
Filtrable Solids as mg/l				
Volume Filtered, ml				
Nitrate, as N	4.0	3.9	5.0	3.4

Results Reported As Milligrams Per Liter

Additional Determinations And Remarks The undersigned certifies the above to be true and correct to the best of his knowledge and belief.
