Attn: Mr. David R. Catanach

RE: Temporary Downhole Commingling Enron Oil & Gas James Ranch Unit No. 71 Section 36 A-22S-30E Eddy County, NM

Dear Mr. Catanach:

As a result of our meeting with you on Thursday, October 27, 1994, EOG respectfully requests temporary downhole commingling authority for the Bone Spring and Wolfcamp formations, and a temporary testing allowable of 320 BOPD for a period of 90 days or until issuance of the final Order by OCD concerning this matter.

EOG plans to present the test data and other documentation to receive approval for downhole commingling at the December 7, 1994 Hearing Docket.

The two formations were completed together and fracture treatment flowback began on October 27, 1994. Fracture cleanup should take two weeks and then EOG will isolate each zone with packer and bridge plug for several weeks of testing each formation separately. Production volumes will then be allocated between the formations based on the testing results.

Please note that working interests, royalty interests, and overriding royalty ownerships in this wellbore are identical for the Bone Spring and Wolfcamp sand intervals. The subject well's lease is on State acreage within the James Ranch Federal Unit and is subject to Federal participating area guidelines. Enron will address this subject more fully at the December 7, 1994 hearing. EOG has already met with BLM and State Land Office representatives concerning future possible PAs and have both agencies' approvals to go ahead with the current testing plans as outlined above.

Mr. David Catanach November 2, 1994 Page 2

Please call me at (915) 686-3698 with any questions or data requests.

Respectfully yours,

**ENRON OIL & GAS COMPANY** 

Randall S. Cate

PSlate

**Project Reservoir Engineer**
