STATEMENT OF THE CASE

APPLICANT

Applicant is operator of the West Lovington Strawn Unit, a secondary recovery unit with a gas injection pressure maintenance project. Wells in the Unit are subject to production restrictions to prevent harm to the reservoir. Applicant seeks to restrict production from wells outside the Unit which are completed in the same the Strawn reservoir in which Unit wells are completed. Without the requested production restrictions, non-Unit wells benefit unfairly from the pressure maintenance project without having to pay a portion of its costs. This application affects a

portion of the West Lovington-Strawn Pool. The production restrictions would remain in place pending unitization of additional acreage outside the Unit.
