Re: Galileo 34 State Com No. 1 Well  
Township 17 South, Range 28 East  
Section 34: W/2  
Eddy County, New Mexico

Please be advised that ARCO Permian, a unit of Atlantic Richfield Company, hereinafter referred to as "ARCO", proposes the drilling of an 10,700' Morrow test well at an unorthodox location in the S/2 SW/4 of Section 34, Township 17 South, Range 28 East, Eddy County, New Mexico. It is currently anticipated that the drilling and proration unit for this well will be the W/2 of said Section 34. Attached for your review is a copy of our drilling cost estimate for this well which indicates a dry hole cost of \$450,300 and total completed well cost of \$643,600.

Please indicate your election below of either to participate or not to participate in the drilling of this well and return one (1) copy of this letter to the undersigned. In the event that you desire to participate in the drilling of this well, I will submit an Operating Agreement for your review. In the event that you do not desire to participate in the drilling of this well, then ARCO hereby requests a Farmout of your leasehold interest in the W/2 of Section 34, Township 17 South, Range 28 East, Eddy County, New Mexico on the following basis:

1. Within 180 days of the execution of a formal Farmout Agreement, ARCO will commence or cause to be commenced the drilling of an initial test well at the above referenced location. Thereafter, said well shall be drilled to a depth of 10,700' or to a depth sufficient to adequately test the Morrow formation, whichever is the lesser depth.
2. Upon completion of a well capable of producing in paying quantities, ARCO shall earn an assignment of all your leasehold interest in the W/2 of said Section 34, insofar as same is included with the proration unit for said well, from the base of the Abo formation down to a depth of 100' below the total depth drilled. You shall retain an overriding royalty interest in an amount being equal to the difference between all existing burdens and twenty percent (20%).

3. Any overriding royalty interest retained by you will be subject to proportionate reduction.

4. Any acreage not previously earned by drilling the initial well could be earned by the drilling of subsequent wells by not allowing more than 180 days to elapse between the completion of one well and the commencement of the next well.

5. The only penalty for failure to commence the drilling of said initial well would be the termination of said Farmout Agreement.

Should you have any questions or problems concerning the matter, please do not hesitate to contact me by telephone at (915) 688-5270.

Very truly yours,
