New Mexico Oil Conservation Commission
2040 S. Pacheco
Santa Fe, New Mexico 87505

Dear Sirs:

We are in receipt of the Notice entitled: Application of Burlington Resources Oil and Gas Company to amend Division Rules 104.B(2)(a) and 104.C(3)(a) and to adopt New Rules 104.B(2)(b) and 104.C(3)(b) for the establishment of 640-acre spacing, including well location requirements, for gas production blow the base of the Dakota formation in San Juan, Rio Arriba, Sandoval and McKinley Counties, New Mexico.

We have read and are familiar with this proposal and urge the Commission to adopt a 640 acre deep gas spacing unit as Burlington Resources is proposing.

Thank you for your consideration.

Very truly yours,

CROFF OIL COMPANY

Gerald L Jensen

**RE: APPLICATION FOR DEEP POOL SPACING
SAN JUAN BASIN
BURLINGTON RESOURCES OIL & GAS COMPANY, APPLICANT**

Dear Chairman LeMay:

This letter is intended to express support for the pending application by Burlington Resources Oil & Gas Company for 640 acre spacing for certain pools below the base of the Dakota Formation. This application is scheduled for hearing before the New Mexico Oil Conservation Division on March 19, 1997.

Phillips Petroleum Company believes that 640 acre spacing will most efficiently and effectively encourage companies to undertake the risk and expense associated with such deep drilling. Such spacing will allow efficient production of hydrocarbons and eliminate waste which would otherwise result from unnecessary drilling.

Respectfully,

A handwritten signature in cursive script that reads "Patrick H. Noah".
