Attn: Mr. David Catanach - Hearing Examiner

Dear Mr. Catanach:

Chevron currently supports Me-Tex's application for pool contraction of the Skaggs-Drinkard Pool as well as pool creation and special rules for a new "lower Drinkard" oil and gas pool, including a 20,000:1 GOR limit. This application has been set for hearing (case #11,872) before a Division Examiner on November 6, 1997.

Since the suggested 20,000:1 limiting GOR is based primarily on recent completions, Chevron requests that these special rules be made temporary for the usual one-year period. At that time a new hearing should be scheduled to review historical production and development data prior to making these temporary special pool rules permanent.

Chevron appreciates the OCD's consideration of our current position as supporting the formation of temporary special pool rules in this case.

Sincerely,

A handwritten signature in dark ink, appearing to read "F. E. Abegg".

F. E. Abegg, Ph.D.
Petroleum Geologist
