

NORTH SQUARE LAKE UNIT
CONVERT TO INJECTION
NMOCD Form C-108 Section III

Due to the numerous conversions to injection to be performed for this project a separate table has been prepared to address the requested data items on a well by well basis. Some data common to all wells is presented here on this form.

III. Data on injection well(s)

A. Injection well information (see attached schematics)

Tabular data

1. Lease: See attached table.

Well No: See attached table.

Location: See attached table.
2. Casing: See attached table.
3. Injection tubing: All wells will have 2 3/8", 4.7 lb/ft, J-55 internally plastic coated tubing ran in the hole.
4. Packer: All wells will have an internally plastic coated Model AD-1 injection packer set within 100' of the top perf or top of the openhole section.

B. Other well information

1. Injection formation: Yts-Qn-Grbg-SA

Field: Square Lake
2. Existing perforations: See attached table.

Proposed perfs: There are no plans to add any zones at this time.
3. All wells proposed to be converted were drilled as Yts-Qn-Grbg-SA producing oil wells.
4. See attached table.
5. Within the area of these wells there are no shallower or deeper productive zones.
