Subject: Rule 112

I didn't include all of my comments in my earlier e-mail. If we continue to look at special approvals for multiple completed wells I recommend the following.

- 1) I think that we should consider using the expression "be caused" instead of the word "occur" in the first paragraph.
- 2) If we reference submitting the C-107 completely filled out instead of saying what has to be attached to it we can change the form instead of having to change the rule.
- 3) If I received 2 copies of a C-107 how would I know if 2 copies went to SF for approval or if the operator shorted me 2 copies intending district approval? This might require a check box on the form to select district or SF approval.
- 4) 112-A.B.(2) should begin "To obtain district approval . . ."
