RE. Proposed Operating Agreement
dated February 1, 1999
GLA-46
San Juan County, New Mexico

Dear Mr. Corcoran:

Please find enclosed a spreadsheet outlining eight (8) well proposals or re-stimulation projects involving GLA-46 lands. Energen's share of these projects amounts to \$269,002.00, with a Net Reserve add of 722,000 mcf at an enviable cost to find of \$0.37 per mcf. Burlington encourages Energen's joinder of the previously submitted well Afe's and execution of the proposed operating agreement to allow development of these lands. If we don't hear positively from Energen by September 25, 1999, we will initiate force pooling of your interest before the NMIOCD in the aforementioned wells. As we discussed on the phone, it makes good business sense to enter into a modern operating agreement to orderly develop these lands. Burlington is also prepared to make you a cash offer to purchase your GLA interest as another alternative.

Please let us hear from you soon. The proposed JOA was forwarded to you on May 18, 1999.

If you should have any questions concerning the enclosed material, please call me at (505) 326-9756.

Sincerely,

James R. J. Strickler, CPL
Senior Staff Landman
