## Memorandum

DATE:

December 9, 1999

TO:

Ken Beardemphi

FROM:

Jim Brown

RE:

R. L. Burns ATL #1

The following information is attached for APD purposes:

- 1. AFE
- 2. "Before" and "After" wellbore sketches.
- 3. Complete OCD wellfile.

Yates's plan is to re-enter with a pulling unit and reverse unit to drill out plugs to the 8 5/8" casing stub at 1438', dress off stub, tie back 8 5/8" casing from 1438' to surface, drill out plugs to the 8 5/8" shoe plug at 4663', pressure test casing, and rig down pulling unit. We will bring in a drilling rig, drill out plugs to the original TD of 12111', then deepen to the Mississippian at about 12700', log and run 5 1/2" casing. Possible formations to complete are Morrow, Atoka, Strawn, and Cisco. Mud to be used is 9.3 ppg cut brine, 28-33 vis.

If you need more information, please let me know.

Case No. <u>12291</u>
