Re: Inactive Non-Compliance Well Status

Dear Mr. Gum;

In reference to your letter dated July 25, 2001, M.E.W. Enterprise is about 20 to 30 days behind on scheduled work. The O'Brien 17 #2 was to be plugged prior to August 1, 2001. I have blown an engine on my unit and will have it running around the middle of August, which at that time I will plug this well.

The Marlisue Queen Unit has been sold and a new operator is working on getting lease up and going.

All other no compliance wells are producing by pumping unit or swabbing unit (casing swab).

Sincerely,

Russell Whited  
M.E.W. Enterprise
