Ray----

Attached is the latest (11/16/00) list that we have of inactive wells.

If you have documentation showing that these wells are in compliance
please send them in with your work plan.

This work plan should be aggressive in time frame and be specific as to type of work and projected times.

You will note this list is very different in what your field people are showing as inactive.

Please submit your plan on or before 1/07/01.

Thanks TWG.

December 19, 2000

Mr. Tim Gumm
OCD - Artesia

Dear Tim:

Our field people have informed me that the only wells to plug are the Huron and the Brine well in Carlsbad. We have application to plug them and have had 2 plugging contractors that have failed to plug them. I have talked with Randy about making the State 6, Myrtle Myra 3 and the Gulf A #1 injection wells. We will get the applications for the above wells into you as soon as possible.

As far a plugging the Huron and Brine well, we are still working on a plugging contractor.

If you need any more info, please let us know.

Yours truly;

Ray Westall
