Oil Conservation Commission
District One Office
1625 N. French Drive
Hobbs, NM 88240

Mr. Chris Williams,

I, Danny R. Watson would like the O.C.C. to please contact the rightful owners of the following lease operators:

Oryx State "T" Well
SW 1/4 - SW 1/4
Sec 6 - T16S - R36E (this well estimated 1/4 mile west of tank battery).

Also:

Texas Pacific
State "T" #4
Sec 6 T15S - R36E (this well estimated 1/2 mile north of battery).

These well bores are not on me, but tank, battery, flow lines, trash, old boards of all sorts, electric panels and some oil saturated dirt are still there and are on my land.

I would first ask the oil commission to please take necessary steps to help me get this cleaned up and off the land. As I understand it, the operator has had about 10 years plus to take steps to get this removed, but apparently have not.

There is a 210 barrel tank that appears to have fluid in it and 2 bolted 500 barrel tanks on battery location.

BEFORE THE OIL CONSERVATION
DIVISION
Santa Fe, New Mexico
Case No. 12905 Exhibit No. 6
Submitted by: DKD LLC
Hearing Date: September 5, 2002

I have enclosed my card, so if you or the lease operator need to contact me please feel free to do so.

Any help with this matter will be appreciated.

Thank you,

Danny R. Watson
