Re: Revision of Form C-110

Dear Mr. Macey:

I am enclosing a copy of Form C-110, revised as I believe it should be. As you examine the proposed form I believe a number of improvements will be obvious, but the main reasons why I am proposing the revised form are:

1. The revised form will show both the oil and gas transporters and will be filed in quintuplicate so that both transporters may be sent an approved copy, thereby eliminating the necessity of the operator having to file separate forms for oil and gas, when both connections have been made.
2. It provides a space for the operator to indicate the disposition of casinghead gas in the event that it is not being sold. If a gas connection has not been made at the time the C-110 is filed, another form may be filed for the gas connection later, but the fact that a connection is anticipated could be registered on the original C-110. This is essential information for the enforcement of "No-flare" regulations.

I think only one word of Rule 1109 would need to be changed, and that is the number of copies.

If this meets with your approval I would like to distribute the proposed form at the April hearing, explain it, and advertise it for the May hearing.

Yours very truly,

OIL CONSERVATION COMMISSION

A. L. Porter, Jr.

INSTRUCTIONS

This form shall be executed and filed in QUADRUPPLICATE with the District Office of the Oil Conservation Commission, covering each unit from which oil or gas is produced. A separate certificate shall be filed for each transporter authorized to transport oil or gas from a unit. After said certificate has been approved by the Oil Conservation Commission, one copy shall be forwarded to the transporter, one copy returned to the producer, and two copies retained by the Oil Conservation Commission.

A new certificate shall be filed to cover each change in operating ownership and each change in the transporter, except that in the case of a temporary change in the transporter involving less than the allowable production for one proration period, the operator shall in lieu of filing a new certificate notify the Oil Conservation Commission District Office, and the transporter authorized by certificate on file with the Commission, by letter of the estimated amount of oil or gas to be moved by the transporter temporarily moving oil or gas from the unit and the name of such temporary transporter and a copy of such notice shall also be furnished such temporary transporter. Such temporary transporter shall not move any more oil or gas than the estimated amount shown in said notice.

This certificate when properly executed and approved by the Oil Conservation Commission shall constitute a permit for pipe line connection and authorization to transport oil and gas from the property named therein and shall remain in full force and effect until

- (a) Operating ownership changes
- (a) The transporter is changed or
- (c) The permit is cancelled by the Commission.

If any of the rules and regulations of the Oil Conservation Commission have not been complied with at the same time this report is filed, explain fully under the heading "REMARKS."

In all cases where this certificate is filed to cover a change in operating ownership or a change in the transporter designated to move oil or gas, show under "REMARKS" the previous owner or operator and the transporter previously authorized to transport oil or gas.

A separate report shall be filed to cover each producing unit as designated by the Oil Conservation Commission.
