Mr. R. R. Spurrier, Secretary
Oil Conservation Commission of New Mexico
Santa Fe, New Mexico

Dear Sir:

This is to advise you of an error in Commission Case No. 214, Order No. R-16, whereby the $W\frac{1}{2}$ of Section 11 and the $W\frac{1}{2}$ of Section 14, T 28 N, R 10 W were incorrectly added to the Fulcher Basin-Kutz Canyon (Pictured Cliffs) gas pool.

It is recommended by this Committee that the area in question be deleted from the above mentioned pool, as we believe it lies outside the bounds of commercial gas production.

Very truly yours,

B. B. Bradish, Chairman
Northwest New Mexico
Nomenclature Committee

Mr. R. R. Spurrer
Director, New Mexico Oil
Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Mr. Spurrer:

Reference is made to Order No. R-13, Case No. 213, issued March 15, 1950, by the Oil Conservation Commission. The description of the Bloomfield oil pool contained in that order is in error to the extent of including the $W\frac{1}{2}$ sec. 13 and $W\frac{1}{2}$ sec. 24, T. 29 N., R. 11 W.

The description of the Bloomfield oil pool was correctly included in the recommendations of the Northwest New Mexico Nomenclature Committee revised March 22, 1949, and approved by the Oil Conservation Commission June 1, 1949, to include the following land:

T. 29 N., R. 11 W.

Sec. 14, all	Sec. 19, all
15, all	20, all
16, all	21, all
17, all	22, all
18, all	23, all

5500
Pt. C.

T. 29 N., R. 12 W.

Sec. 13, $E\frac{1}{2}$
24, $E\frac{1}{2}$

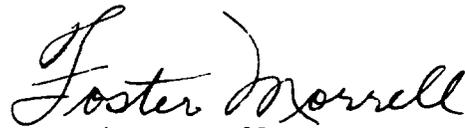

5300
5306-5485
50,00 cu. ft.

You will note that the lands in sections 13 and 24 have been transposed in Order No. R-13 as to the portion of the sections and as to the township.

Accordingly, Order No. R-13 should be amended as to the Bloomfield pool by deleting the $W\frac{1}{2}$ sec. 13 and $W\frac{1}{2}$ sec. 24, T. 29 N., R. 11 W., and in lieu thereof adding the $E\frac{1}{2}$ section 13 and $E\frac{1}{2}$ section 24, T. 29 N., R. 12 W.

The lands in question were added to the definition of the Bloomfield pool to include the Carroll and Cornell well No. 5 in the NE¹/₄NE¹/₄ sec. 13, T. 29 N., R. 12 W., which produced a total of 512 barrels from the Farmington sand. The well was subsequently deepened and completed as a gas producer from the Pictured Cliffs formation and is now included in the Fulcher Basin-Kutz Canyon gas pool.
