Re: Application for a Nonstandard Gas
Proration Unit to be assigned
Sinclair's J. H. Williams Well No. 3
in the Eumont Gas Pool, Lea County,
New Mexico.

Gentlemen:

Sinclair Oil & Gas Company wishes to make this application for an order under Rule R-520 which will establish a Nonstandard Gas Proration Unit of 200 acres to be assigned to subject well.

In this connection Sinclair wishes to state:

1. Sinclair is the Operator of the J. H. Williams Well No. 3 which is located in the SW/4 of the NW/4 of Section 34, T-19-S, R-37-E, Lea County, New Mexico. Subject well was originally completed January 17, 1954, and is therefore entitled to the 320 ft. location tolerance permitted in Order R-520.
2. The Nonstandard Proration Unit Sinclair seeks to have assigned to subject well consists of that part of Sinclair's J. H. Williams lease which contains 200 acres and is located NE/4 NE/4 Section 33-19S-37E and NW/4 Section 34-19S-37E. Subject well is located 660 ft. from south line, and 660 ft. from the most easterly west line of this Unit, and currently has a 160 acre dedication consisting of the NW/4 of Section 34.
3. The length or width of the proposed Unit does not exceed 5280 ft. Both the royalty and the leasehold interests are common under this proposed Unit.
4. All of the acreage within the proposed Unit may reasonably be presumed productive of gas.
5. All of the contiguous acreage in Section 33 is currently dedicated. All of the contiguous acreage in Section 34 is currently dedicated except:
 - a. NE/4 which has been unitized by Sinclair and is in the process of being developed.

6. Sinclair believes that the granting of this application is in the interest of conservation and the protection of correlative rights.

Sinclair, therefore, requests that a public hearing be called for the purpose of considering and granting this application.

Yours very truly,

SINCLAIR OIL & GAS COMPANY
