At this time it is also desired to get approval for producing Well No. 26, located 1305' FSL and 1980' FEL (Unit B) Section 13, T. 20 S., R. 28 E. This well was drilled in 1951 as a gas input well. Recently, gas injection has been discontinued due to lack of gas, and it is now a producing oil well. Since the location is non-standard, it is desired to have the commission's approval to produce at this time.
