Dacresa Corp.  
P. O. Box 396  
Scottsdale, Arizona

Gentlemen:

On May 27, 1959, we sent you a copy of "Application for Dual Completion" of our Breech PMD-224, NE<sup>1</sup>/<sub>4</sub>NE<sup>1</sup>/<sub>4</sub>, Section 13, T 26 N, R 7 W, Rio Arriba County, New Mexico. This application was submitted to the New Mexico Oil Conservation Commission for administrative approval. We have since been notified by the Commission that the mechanical arrangement of the completion does not fully satisfy conditions necessary for administrative approval.

We are therefore submitting another application which provides for a Pictured Cliffs, Mesa Verde, and Greenhorn triple completion, utilizing three strings of tubing as shown on the attached diagrammatic sketch.

An electrical log of this well and a plat showing ownership of acreage offsetting the section in which the well is located accompanied the copy of application sent to you May 27, 1959.

Yours very truly,

CAULKINS OIL COMPANY

Case 1722*

Mr. Daniel S. Nutter  
New Mexico Oil Conservation Commission  
P. O. Box 871  
Santa Fe, New Mexico

Dear Sir:

Confirming our telephone conversation of last Monday, we have discussed the running of an Otis Side Door Choke on tubing with Otis Engineering Company and have found that a standard model choke can be altered at one of our local machine shops so that it can be locked in the choke seating nipple.

During the hearing of Case Number 1722 you suggested that the choke would be more trouble free if locked in place in the seating nipple to prevent unnecessary vertical movement. We surely agree with your suggestion and if our Application to Triple Complete Breech PMD-224 is approved, the choke will be locked in the seating nipple.

Thanks again for your interest and help in this matter.

Yours very truly,

CAULKINS OIL COMPANY
