Que 24/12 OIL CONSERVATION COMMISSION P. O. BOX 871 SANTA FE, NEW MEXICO October 5, 1961 Val R. Reese & Associates, Inc. Lobby of the Simms Building Albuquerque, New Mexico Attention: Mr. Morris B. Jones Gentlemen: Your application for administrative approval of an unorthodox gas well location for your Benn Well No. 1-9 has been set for public hearing before one of the Commission's examiners on October 25, 1961. Upon a review of Rule 104 of the Commission's Rules and Regulations, particularly that part of the rule per-taining to reclassified wells in San Juan, Rio Arriba and Sandoval Counites, it appears that your application is not eligible for administrative approval. Very truly yours, RICHARD S. MORRIS Attorney RSM/esr

CONSULTING GEOLOGISTS ALBUQUERQUE, NEW MEXICO SIMMS BUILDING September 7, 1961

VAL R. REESE & ASSOCIATES, Inc.

PHONE 243-3569

New Mexico Oil Conservation Commission P. O. Box 871 Santa Fe, New Mexico

Attention: Mr. Richard Morris

Dear Sir:

Val R. Reese & Associates, Inc. requests administrative approval of an unorthodox gas well location for their 1-9 Benn well located 2210' fnl and 330' fel, Section 9, T-23N, R-7W, in an undesignated field in Rio Arriba County, New Mexico.

This well, as shown on the attached Form C-128, is located 330' from the quarter section line. This well was drilled as an oil well since the surrounding wells in this area are oil producers. The attached Form C-116 shows that this well has a GOR of 72,920 cubic feet per bbl. which puts it well above the gas well classification.

On the attached Form C-128 the NE/4 of Section 9 will be dedicated to this well to conform to the acreage requirements for a gas well. The dedicated acreage will amount of 152.02 acres. This unorthodox acreage unit is required because of the unorthodox size and shape of this Section as determined by surveys.

All offset operators have been sent a copy of this letter and the attached forms.

Very truly yours,

MBJ: mm Encl.

6 Jear 29/2

#### OIL CONSERVATION COMMISSION

1000 RID BRAZOS ROAD AZTEC, NEW MEXICO

September 1, 1961

Val n. neese a Associates Lobby, wirms Luilding Albuquerque, New Mexico

het Val h. heese #1-9 Benn 330/E line; 2210/N Line Section 9-23N-7V

Attn: Ar. Morris 2. Jones

Jear ar. Jones:

We have received Form C-116 and revised Form C-128 pertaining to the above well along with the request for re-classification from oil well to gas well.

This well is not spaced in conformance with Rule 104, Faragraph 2 of the New Mexico Oil Commission Rules and Regulations which states that a gas well in District #3 shall be located a minimum of 790 feet from the quarter-section line. It also appears that the well is not eligible for administrative approval because of the fact that the reason for the unorthodox location was not topography. Therefore, before this well can be classified and produced as a gas well it will be necessary that application for a non-standard location be filed with Mr. A. L. Porter, Jr., Secretary-Director of the Johnission so that the matter may be set for hearing.

In the meantime I would suggest that you produce the well as an oil well, using a limiting gas-oil ratio of 2,000 cubic feet per barrel of oil.

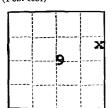

**ILLEGIBLE** 

Yours very truly

ECA: ks

Emery C. Arnold
Supervisor, District #3

cc: Mr. A. L. Porter v OCC, Santa Fe, N.M. Form 9-331 a (Feb. 1951)

produced on the official test.

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission.

Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60 degrees F. Specific gravity base will be 0.60.

Mail original and one copy of this report to the district office of the New Mexico Oil Conservation Commission. In accordance with Rule 301 and Appropriate Pool Rules.
