CONDENSATE RECOVERIES FROM MORROW WELLS

lh126rcl

WELL NAME	TEST RATE	API GRAVITY	YIELD BBL. CONDENSATE PER MMCFG
Andrikopoulos No. 1	Dry Gas	No recovery on 4 point test	Todate - 1.63 BC/MMCFG
Bell Lake 2 St. No. 1	Dry Gas	No recovery on 4 point test	Todate - 5.9 BC/MMCFG
Half 6 Fed. No. 1	Dry Gas	1 BBL 51 degree on 4 point test	Todate - 2.0 BC/MMCFG

These wells were selected to demonstrate that the gas wells produce dry gas with very little condensate. This satisfies the requirement that no well is expected to produce without stimulation more than five barrels of crude oil.
