Re: Application of Arapaho Oil & Gas for Approval of Salt Water Disposal,
Eddy County, New Mexico

Dear Mr. LeMay:

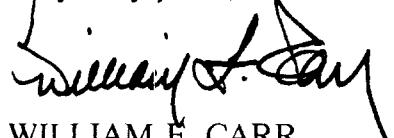

Enclosed is an original and one copy of completed Oil Conservation Division Form C-108 which is the application of Arapaho Oil & Gas in the above-referenced matter.

Arapaho requests that this case be set for hearing before a Division Examiner on December 17, 1992.

By copy of this letter we are sending a copy of this application to the Oil Conservation Division's District Office in Artesia, New Mexico.

Your attention to this matter is appreciated.

Very truly yours,

WILLIAM F. CARR

WFC:mlh

Enclosures

cc w/o enc.: Mr. Randall L. Harris

NOV 1 1990 Case 10640

APPLICATION FOR AUTHORIZATION TO INJECT

OIL CONSERVATION DIVISION

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? Yes No

II. Operator: ARAPAHO OIL & GAS

Address: P.O. Dwr. 9 Carlsbad New Mexico 88221

Contact party: Randall L. Harris Phone: (505) 365-2237

III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project? yes no
If yes, give the Division order number authorizing the project _____.

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

* VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

*VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

* X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)

* XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

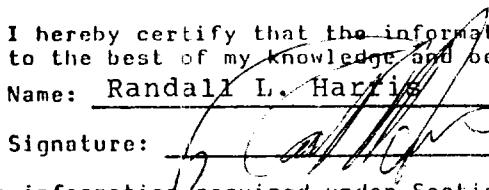

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.

XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Randall L. Harris Title Agent-Geologist

Signature:  Date: 11/2/92

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

III. WELL DATA

- A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:
- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
 - (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
 - (3) A description of the tubing to be used including its size, lining material, and setting depth.
 - (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Other Data

1. Name of the injection formation San Andres

2. Name of Field or Pool (if applicable) Cave Grayburg-SanAndres

3. Is this a new well drilled for injection? Yes No

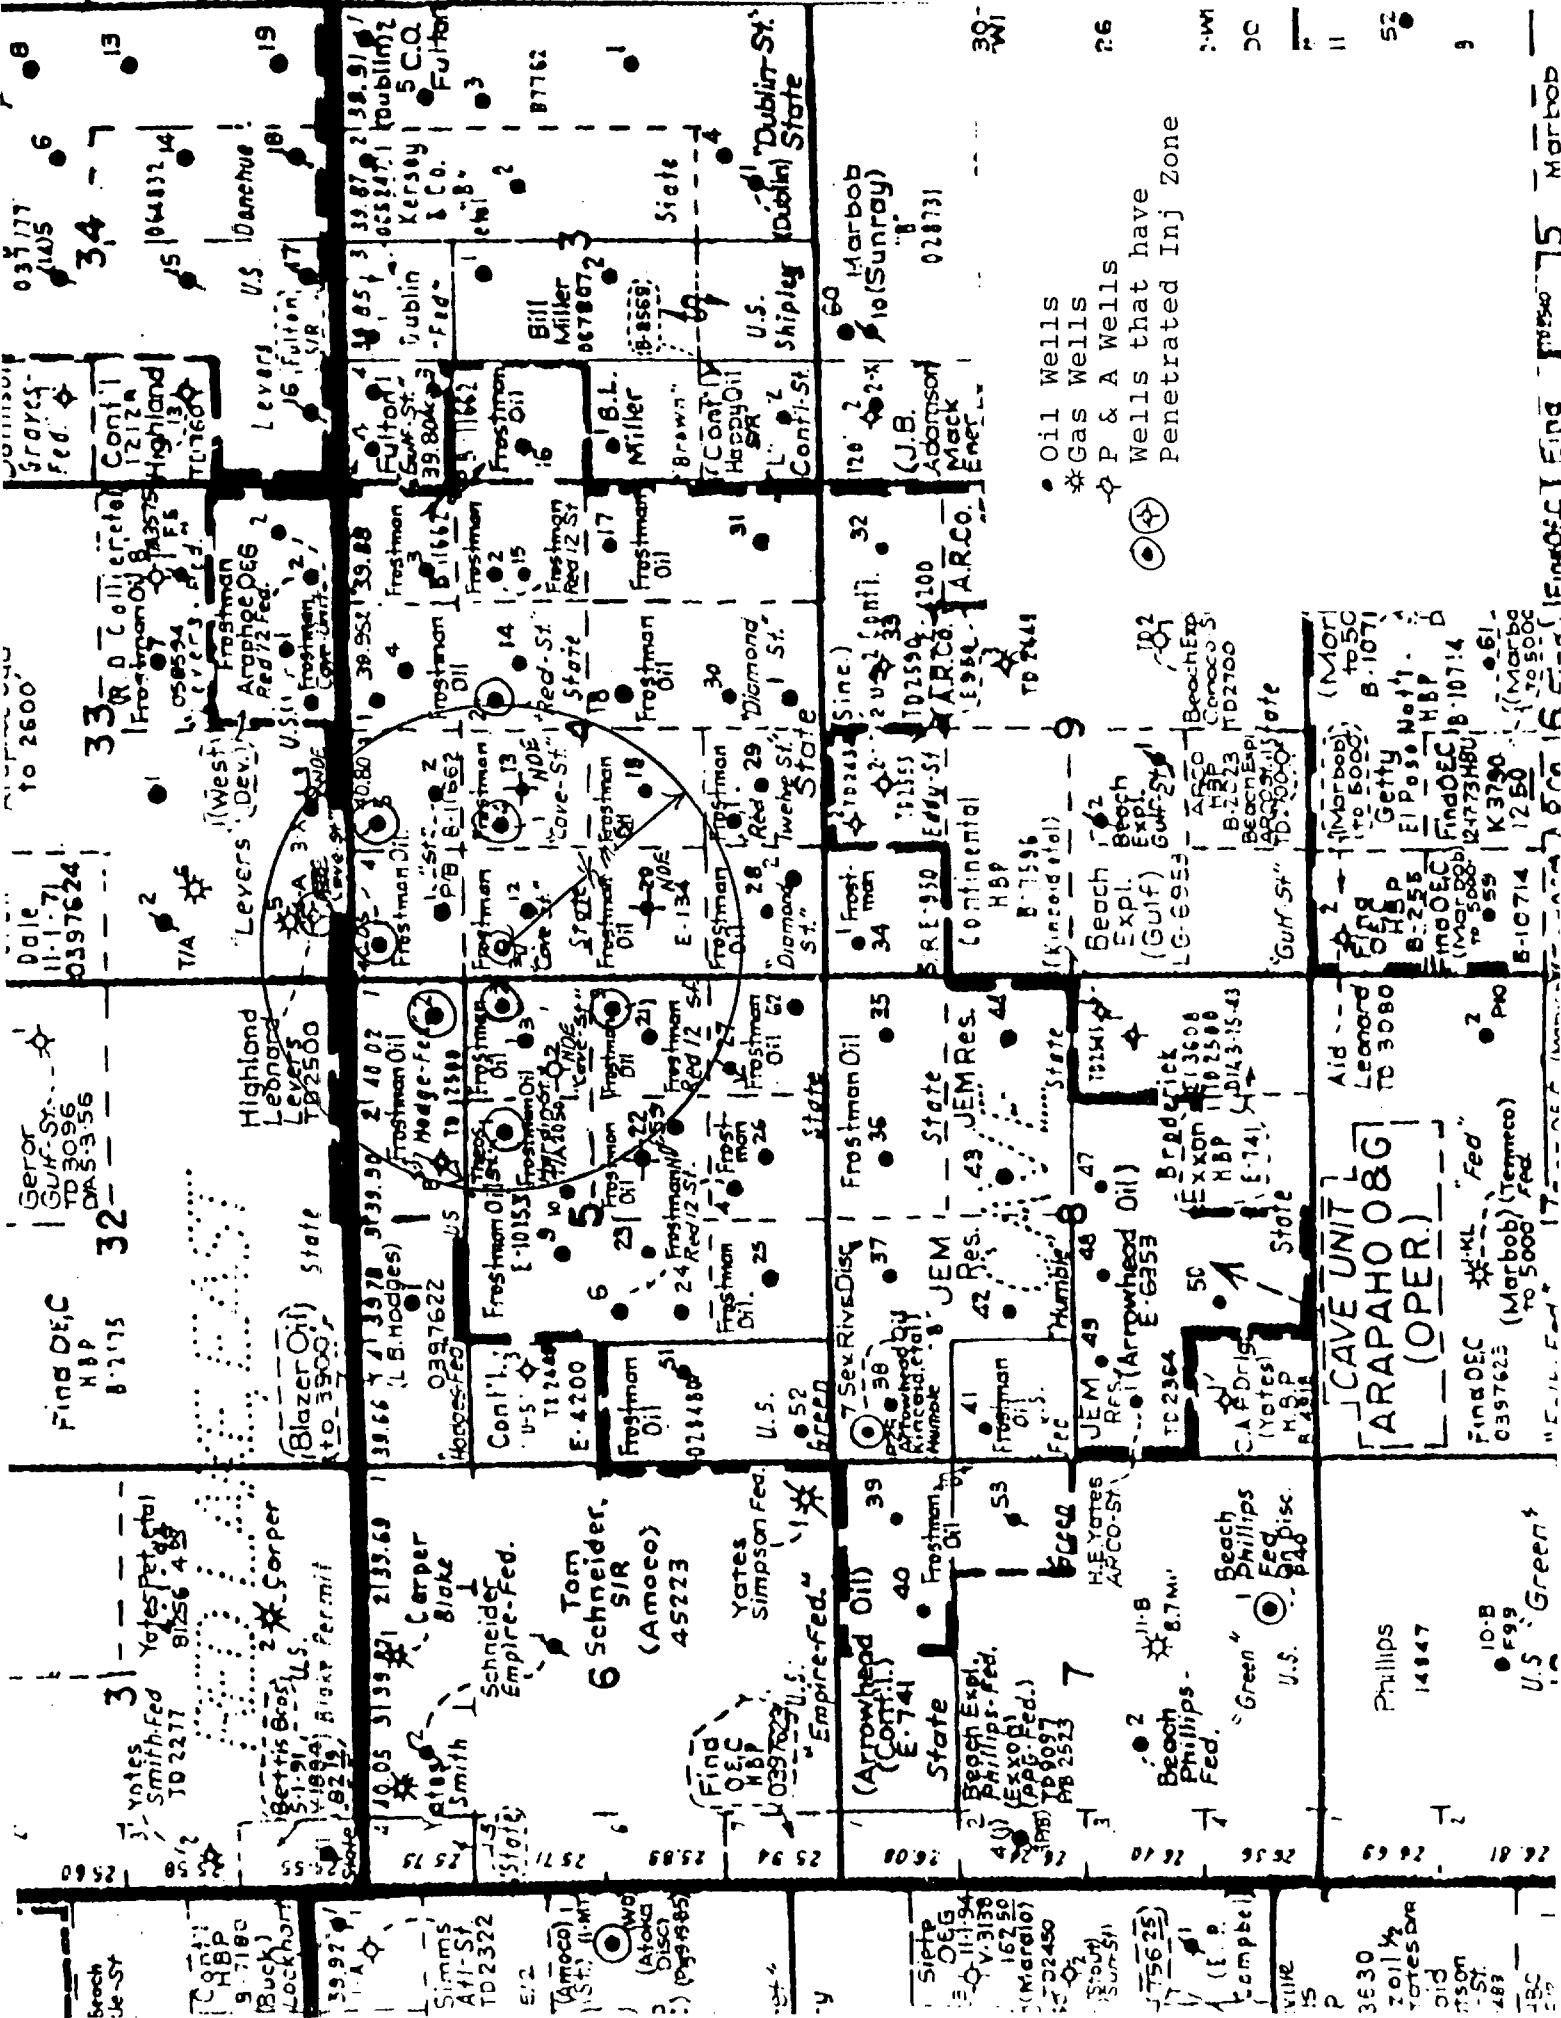

If no, for what purpose was the well originally drilled? Oil Production

4. Has the well ever been perforated in any other zone(s)? List all such perforated intervals and give plugging detail (socks of cement or bridge plug(s) used) No other zones have been perforated

5. Give the depth to and name of any overlying and/or underlying oil or gas zones (pools) in this area.

Grayburg 2360'-2390

V. AREA OF REVIEW & LEASES

IV. Nine wells have penetrated the proposed injection zone within the $\frac{1}{2}$ mile radius of the proposed injection well, with one well plugged. Well data attached.

VII. The average daily volume of 300 BWPD at 2 BPM. Expected maximum of 400 BWPD.

The system will be closed.

Average injection pressure of 150#, maximum of 450#.

Source of injection water is from the SanAndres Formation. Analysis of the water is attached.

The disposal zone does produce within one mile of the proposed injection well. Water analysis is attached.

VII. The proposed injection zone is the Lovington Sand of the SanAndres Formation. The Lovington Sand is a fine-grained Quartz sand with varing amounts of shales. It is 26 feet thick, at a depth of 2448-2474'. There is no sources of drinking water overlying or underlying the injection interval.

IX. No stimulation of the injection zone is proposed.

X. Well history is attached.

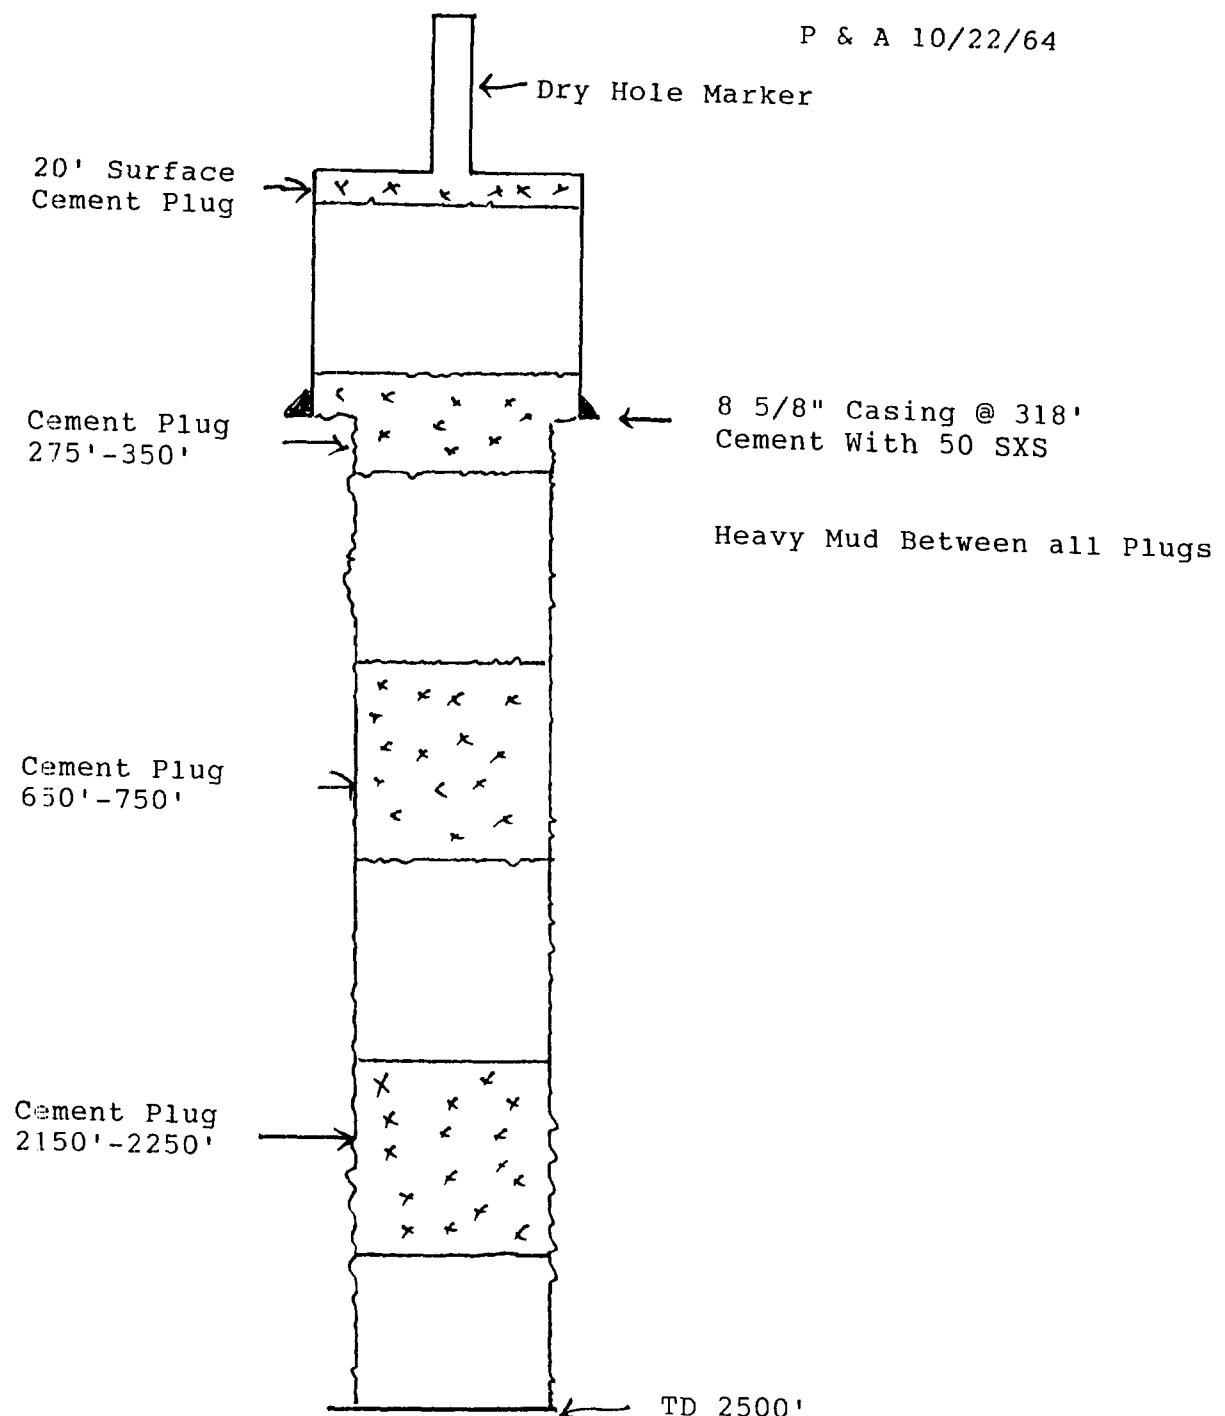

XI. There is no producing fresh water wells within one mile of the proposed disposal well.

XII. All available geologic and engineering data has been examined. No evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water has been found.

Well was drilled out from original TD of 2417 to 2519. Lovington sand of the San Andres Formation was encountered at 2455-2465. Set packer at 2391 and treated with 10,000 gal. gelled water and 10,000 # sand. Swabbed back most of treatment and installed pump. 24 hour test 7-1-82 - 4 bbls oil and no water, gas TSTM. Left packer set at 2391- open hole 2417 -2519.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
