**STATEMENT OF CASE**

APPLICANT:

(1) Marathon Oil Company proposes to drill its well at a location 660 feet FWL and 1980 feet FSL of Section 36, T20S, R24E with a S/2 dedication for the Morrow Production.

(2) Currently, it is too risky in this spacing unit to drill a well at a standard well location to test only the Morrow formation. By drilling the proposed Cisco formation well and deepening into the Morrow formation, the Applicant can reduce the risk and test for Morrow production that might otherwise never be tested.

(3) The proposed location will afford Marathon and the interest owners in the proposed well the optimum location at which to test for both Morrow or Cisco production.

(4) The offset operator, Conoco, Inc., has waived any objection.
