Santa Fe, New Mexico 87503

Attn: Mr. Mike Stogner

Request for Hearing Date of June 3, 1993

MW Petroleum Corporation/Apache Corporation respectfully requests that its application to drill the Federal C #2 be set for examiner hearing on the June 3, 1993, docket.

MW Petroleum Corporation, as the operator of Section 35, Township 21 South, Range 23 East, Eddy County, New Mexico, proposes to drill the Federal C #2 at an unorthodox location 800' from the South and West lines of Section 35 to test the Indian Basin (Upper Penn) Gas Pool. An exception to the well location requirements of Rule 2(B) of the Special Rules and Regulations for the Indian Basin (Upper Penn) Gas Pool is required for the proposed location. The pool rules require a standard location to be 1650' from the outer boundary of the section.

MW Petroleum is recommending that an acreage factor of 0.68 be assigned to the proposed well for gas allowable purposes.

Upon successful completion of the proposed Federal C #2, MW Petroleum will plug and abandon the Federal C #1 wellbore.

Approval of this application will allow MW Petroleum to produce its just and equitable share of hydrocarbons underlying this spacing unit. This will result in the prevention of waste and the protection of correlative rights.

Should any questions arise regarding this application please do not hesitate to contact me at (713) 296-6306. Thank you for your attention to this matter.

Sincerely yours,

Ceci Searls Leonard
