Attention: Mr. Bill Lemay, Director

**Re: Application of OXY USA Inc. for Expansion of Authorization to Inject (C-108) for  
East Eumont Unit, Queen Formation, Eumont Yates Seven Rivers Queen Pool, Lea  
County, New Mexico**

Dear Mr. Lemay:

Please find enclosed our C-108 application to expand our existing authority for our East Eumont Unit. Injection was originally authorized under Order No. R-2901, but we propose an additional injection well in the north area. OXY is also attempting to qualify this project for the Recovered Oil Tax Rate, so the enclosed C-108 covers all injection wells in the proposed project area. Publication of the legal notice has been requested and will be forwarded as soon as it is available. All parties listed on the attached service list have been sent a copy of this application on or before this date. Proof of such will also be sent as soon as possible. If you have any questions relating to this application please call me at 915/685-5913 or Scott Gengler at 915/685-5825. Thank you for considering our application.

Sincerely,

Richard E. Foppiano  
Regulatory Affairs Advisor  
Western Region - Midland

APPLICATION FOR AUTHORIZATION TO INJECT

Case 10866

- I. Purpose:  Secondary Recovery  Pressure Maintenance  Disposal  Storage  
Application qualifies for administrative approval?  yes  no

II. Operator: OXY USA Inc.

Address: P. O. Box 50250, Midland, TX 79710

Contact party: Scott E. Gengler Phone: (915) 635-5325

III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project?  yes  no R-2901  
If yes, give the Division order number authorizing the project I-5569

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

\* VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

\*VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

\* X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)

\* XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.

XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Scott E. Gengler Title Engineering Advisor

Signature:  Date: July 20, 1993

\* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal. I-5569, original application

## III. WELL DATA

- A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:
- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
  - (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
  - (3) A description of the tubing to be used including its size, lining material, and setting depth.
  - (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.
- (1) The name of the injection formation and, if applicable, the field or pool name.
  - (2) The injection interval and whether it is perforated or open-hole.
  - (3) State if the well was drilled for injection or, if not, the original purpose of the well.
  - (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
  - (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

## XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

**Responses to C-108**

VII

1. Average Daily Injection Rate - 300 BWPD per well  
Maximum Daily Injection Rate - 500 BWPD per well
2. The proposed system is a closed system.
3. Average Injection Pressure - 1200 psi  
Maximum Injection Pressure - 1800 psi
4. Sources of water:
  - a. Produced water from the East Eumont Unit.
  - b. Fresh Water
5. Injection is not for disposal purposes.

VIII Previously Submitted

IX Each of the proposed injection wells will be acidized with 3000 gallons of acid.

### Legal Notice

OXY USA Inc., P. O. Box 50250, Midland, Texas, 79710, 915/685-5825, Scott Gengler - Engineer, proposes to inject water for secondary recovery purposes into the East Eumont Unit well #'s 2, 4, 6, 7, 9, 11, 12, 14, 16, 18, 20, 22, 25, 28, 30, 32, 35, 36, 37, 39, and 41 located in sections 33 and 34 of T-18S, R-37E and sections 3, 4, 5, 9, 10, 15, and 16 of T-19S, R-37E, Lea County, New Mexico. Water will be injected into the Queen formation at an average depth of 3900' at an approximate rate of 300 BWPD per well and at a maximum pressure of 1800#. Interested parties must file objections or requests for hearing with the New Mexico Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico, 87501, within fifteen(15) days of receipt of this notice.
