Texaco Exploration and Production Inc. recently submitted a proposal to the New Mexico Oil Conservation Division for certification of Enhanced Oil Recovery on the Cooper Jal Unit. The proposal included the subject wells as downhole commingled infield producers. The Jalmat and Langlie Mattix pools have been simultaneously waterflooded since October 1970. All produced fluids have entered a common production and injection facility since that time with no fluid compatibility problems. All pertinent information on the subject wells was submitted to you in our first notice of intent dated September 10, 1993. If you have any questions or further requests, please contact me at (505) 393-7191.

Interested parties must file objections and respond at the hearing, or apply for postponement of this hearing at the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico, 87501, within fifteen (15) days of receipt of this letter.

Sincerely,

Michael C. Alexander
