10183*

RE: **Angel Peak B #31**  
~~990'FNL, 1650'FWL~~  
~~Section 25, T-28-N, R-11-W~~  
San Juan County, New Mexico

Dear Mr. LeMay:

This is a request for administrative approval for a non-standard gas well location in the Basin Fruitland Pool.

Meridian Oil intends to plugback and recomplete the Angel Peak B #31 well from the Wildcat Gallup pool to the Basin Fruitland Coal Pool. The current location of this well is 990'FNL, 1650'FWL, Section 25, T-28-N, R-11-W, San Juan County, New Mexico. The well is considered non-standard due to the NE-SW dedicated pattern established for the Basin Fruitland Coal Pool. To comply with the New Mexico Oil Conservation Division rules, Meridian is submitting the following for your approval of this non-standard location:

1. C-102 plat showing location of the well;
2. Plat showing offset owners/operators;
3. Affidavit of notification of offset owners/operators;
4. Copy of Well Completion Log for original completion.

A copy of this application is being submitted to all offset owners/operators by certified mail with a request that they furnish your Santa Fe office with a Waiver of Objection, and return one copy to this office.

Sincerely yours,

  
Peggy Bradfield  
encl.

WAIVER

Marathon Oil Co hereby waives objection to Meridian Oil Inc.'s application for a non-standard location for their Angel Peak B #31 as proposed above.

Attention: Peggy Bradfield

*RE: Unorthodox coal gas well location, Union Texas Petroleum Corporation's Angel Peak "B" Well No. 31, 990' FNL - 1650' FWL (Unit C); 25-T28N-R11W, NMPM, Basin-Fruitland Coal Gas Pool, San Juan County, New Mexico.*

Dear Ms. Bradfield:

By Division Administrative Order NSL-2688, dated August 17, 1990, Union Texas Petroleum Corporation was granted an exception to the well location requirements in the Basin-Fruitland Coal Gas Pool for the subject well. Meridian, evidently, has overlooked this since your application is requesting the identical exception, resulting in the need for additional supporting information. At this time said Order NSL-2688 is hereby stayed pending additional information to clarify the following:

- (1) Meridian's involvement in this well;
- (2) Why this well was chosen over any existing wells in the SW/4 of this Section; and,
- (3) How will this off-pattern recompletion effect coal gas development in the surrounding Section.

Our records still show Union Texas Petroleum Corporation as operator of the subject well, what is Meridian's involvement? Has there been a C-104 (Change of Operator) filed for this well?

Please provide me a detailed plat showing all wells in the W/2 of this Section. For each well please show its status, well name, and number, operator, footage location, spud date, current completed interval and discuss why this well has been chosen over the wells in the SW/4 of the Section.

*Meridian Oil, Inc.*  
*Attention: Peggy Bradfield*  
*November 8, 1990*  
*Page 2*

Further, please submit any supporting production data, engineering evaluation and related technical data to support your choice of wells for recompletion. Also submit a plat of the offsetting sections showing the coal completions presently planned or currently producing and provide a discussion addressing the proposed off-pattern development.

Should you have any questions, please contact me.

Sincerely,

A handwritten signature in cursive script, appearing to read "Michael E. Stogner".

Administrative Order NSL-2688

Dear Mr. White:

Reference is made to your application of July 24, 1989 for a non-standard coal gas well location for your existing Angel Peak "8" Well No. 31 located 990 feet from the North line and 1650 feet from the West line (Unit C) of Section 25, Township 28 North, Range 11 West, NMPM, Basin Fruitland Coal (Gas) Pool, San Juan County, New Mexico. The W/2 of said Section 25 shall be dedicated to the well forming a standard 320-acre gas spacing and proration unit for said pool.

By the authority granted me under the provisions of Rule 8 of the Special Rules and Regulations for the Basin-Fruitland Coal (Gas) Pool as promulgated by Division Order No. R-8768, the above-described unorthodox coal gas well location is hereby approved.

Sincerely,

A handwritten signature in cursive script, appearing to read "William J. LeMay".

Dear Mr. LeMay:

Various companies have filed requests with your office for administrative approval of non-standard gas well locations in the San Juan Basin Fruitland Coal Gas Pool. We believe that all of these locations are selected to encroach upon our coal and gas resources under the disguise of non-standard locations. We are opposed to drilling any well at the proposed locations without compensation to our company for taking of our gas.

We also noticed that each of the operators has clearly avoided furnishing the logs to us which will establish the drainage on our resources of coal and gas and therefore, we sincerely request that the proposed locations not be approved.

Please register our objection to approving any of the locations listed above.

Thank you.

Sincerely,

*RE: Division Case No. 10183: Application of Meridian Oil, Inc. for an unorthodox coal gas well location, Union Texas Petroleum Corporation's Angel Peak "B" Well No. 31, 990' FNL - 1650' FWL (Unit C); 25-T28N-R11W, NMPM, Basin-Fruitland Coal Gas Pool.*

Dear Mr. Kellahin:

By Division Order No. R-9436 the subject application was dismissed. Please refer to my letter to Meridian Oil, Inc. dated November 8, 1990 which stayed said administrative order pending clarification of several issues. On November 13, 1990 an objection to this matter was received from General Minerals Corporation which resulted in the need of placing the matter on the hearing docket.

There are still many issues to be resolved in this matter before this well may be recompleted in the Basin-Fruitland Coal Gas Pool, if such a plan still exists by either Meridian or Union Texas.

Therefore, Division Administrative Order NSL-2688, dated August 17, 1990 is hereby placed in abeyance until further notice.

Sincerely,

Michael E. Stogner  
Chief Hearing Officer/Engineer
