|----|--|
| 2  |  |
| 3  | MR. STOGNER: We will now call                                |
| 4  | Case Number 8341.  |
| 5  | MR. TAYLOR: The application of                               |
| 6  | Lynx Petroleum Consultants, Inc. for compulsory pooling, Lea |
| l  | County New Mexico.   |
| 7  | MS. AUBREY: Karen Aubrey, Kel-                               |
| 8  | ahin and Kellahin, appearing for the applicant.              |
| 9  | I have one witness to be sworn.                              |
| 10 |  |
| 11 | (Witness sworn.)   |
| 12 |  |
| 13 | LARRY SCOTT,   |
| 14 | being called as a witness and being duly sworn upon his      |
|    | oath, testified as follows, to-wi:                           |
| 15 |  |
| 16 | DIRECT EXAMINATION   |
| 17 | BY MS. AUBREY:   |
| 18 | Q Would you state your name, please?                         |
| 19 | A My name is Larry Scott. I'm employed by                    |
| 20 | Lynx Petroleum Consultants, Inc. as a Vice President.        |
| 21 | Q Mr. Scott, do you have any professional                    |
| 22 | degrees?   |
| 23 | A Yes, I have a Bachelor of Science degree                   |
|    | in electrical engineering from the University of Texas at    |
| 24 | Austin.  |
| 25 | Q Can you recite for the Examiner what your                  |

```
5
1
    professional work experience has been to date in the oil and
2
    cas industry?
3
                        I have seven years of experience with
4
    Conoco, Incorporated, as a drilling and production engineer,
5
    and supervising production engineer, and three years of ex-
6
    perience with Lynx Petroleum Consultants, independent opera-
7
    tor.
8
                        And you're presently employed by Lynx at
             Q
    this time?
9
                       That is correct.
             Α
10
                       Mr. Scott, have you reviewed the applica-
11
    tion of Lynx Petroleum for compulsory pooling of the mineral
12
    interests underlying the northeast of the southwest quarter
13
    of Section 25, Township 16 South, Range 37 East?
14
                       Yes, I have.
             Α
15
                                  MS.
                                       AUBREY:
                                                 Mr. Examiner, at
16
    this time I tender Mr. Scott as an expert petroleum engi-
17
    neer.
                                  MR.
                                       STOGNER:
                                                  He is so quali-
18
    fied.
19
                                  All right, Ms. Aubrey, you may
20
    continue.
21
                                  MS.
                                       AUBREY:
                                                 Thank
                                                               Mr.
                                                        you,
22
    Examiner.
23
                       Mr.
                             Scott, have you prepared certain ex-
24
    hibits for the consideration of the Examiner this morning?
25
             Α
                       My partners in this project have prepared
```

6 1 these exhibits. Who is your partner in this project? Q 3 Α Southern Union Exploration, Incorporated, 4 out of Dallas, Texas. 5 And what percentage of this project does 6 Southern Union Exploration have? 7 Thirty-five percent. Α 8 And who has the remaining percentage? Q 9 Lynx Petroleum Consultants. Α And you are seeking to pool the interest 10 approximately 6.825 mineral interest underlying the 11 northwest quarter of the southwest quarter of Section 25. 12 That is correct. 13 0 Let me refer you to Exhibit One. Does 14 that plat show the proposed location of the well? 15 Exhibit One shows the proposed location Α 16 of the well, 2100 feet from the west line and 1650 feet from 17 the south line of Section 25. 18 Is that a standard location, sir? Α Yes, it is. 19 Let me refer you now to Exhibit Number 20 Can you identify that for us? 21 Exhibit Number Two, page one is a Form C-22 101, Application for Permit to Drill. 23 Exhibit Two, page two, is a C-102, Loca-24 tion Plat, for the same well. 25 Q And does that show the proposed location

```
7
1
   cf the well?
2
                      Yes, it does.
            Α
3
                       Let me refer you now to Exhibit Number
            0
4
   Three.
           Can you identify that, please?
5
                        Exhibit Number Three is an AFE to drill
6
   and complete the subject well.
7
             0
                       And what are the estimated well costs for
8
   completing the well in question?
9
            Α
                        Total well cost is estimated to
                                                              be
   $385,000.
10
                       And do you have an opinion, Mr. Scott, as
11
   to whether that's a reasonable cost for a well drilled to
12
   this formation?
13
            Α
                       Yes, I believe it is.
14
                       Let me refer you now to Exhibit Number
             0
15
   Four. Can you identify that, please?
16
             Α
                        Exhibit Number Four is a list of
17
   mineral holders under the northeast of the southwest quarter
   of Section 16 that have not agreed to either lease or join
18
   in the prospect.
19
            O
                      And Exhibit Number Five, sir?
20
             Α
                        Exhibit Number Five is a recap of
21
   correspondence between Southern Union and those six mineral
22
   owners.
23
             Q
                         And that would be
                                                Southern
                                                           Union
24
    Exploration, who is your partner in this well.
25
             Α
                       That is correct.
```

Now let me refer you to the next exhbiits as a group. That would be Exhibit Number Six through Exhibit Number Seventeen. Can you look through those and identify them for the Examiner?

A Okay, Exhibits Six through Seventeen are first offers to lease the subject minerals and then an offer to allow these people to participate or asking them to participate in the subject well.

Q And these would be the same mineral interest owners that are shown on your Exhibit Number Four, is that correct?

A That is true.

Q If you'd look at specifically Exhibits Ewelve through Seventeen, now, Mr. Scott. Can you tell the Examiner whether or not an AFE, or a copy of an AFE, which we've introduced as Exhibit Number Three, was attached to each of these letters and sent to the mineral interest owners?

A Yes, it was.

Q And now let me refer you to Exhibit Number Eighteen. Can you identify that, please?

A Exhibit Number Eighteen is registered mail receipts to each of the six parties, attesting the fact that they did receive the AFE asking them to join in the proposed well.

Q And that would have been attached to your say 23rd, 1984 letter which we've introduced copies of as

9 1 Exhibits Twelve through Seventeen. 2 I believe that is correct. 3 What response, if any, did you receive from these mineral owners in response to your letters either 5 to lease or to join in the well? 6 Α The response was they did not want 7 lease; they did not want to join; and a couple of the par-8 ties indicated that we should go ahead and force pool them. 9 On two or three we had no response whatsoever. 10 But you do have return receipts from 11 those two or three who did not respond? 12 Yes, we do. A 13 Do you have an opinion, Mr. Scott, as to 14 whether or not the combined efforts of Lynx and Southern 15 Inion Exploration to give these people the opportunity to 16 join in the well have been reasonable and fair? 17 I believe they have. Scott, are you seeking a risk factor 18 in connection with the compulsory pooling in this case? 19 Α Yes, we are. 20 Can you tell the examiner what risk fac-21 tor you're seeking? 22 200 percent. Α 23 That would be 200 percent over the cost 24 of completing the well. 25 Α That is correct.

Q Let me refer you back to your Exhibit Number One. Will that help you in explaining to the Examiner the justification for the penalty which you seek to have imposed?

A Yes, it will.

Q I'd like you to look at that and tell the Examiner whether or not from the proposed location there are any controls to the north in this formation.

A Okay, this -- the proposed location is on the extreme northwest edge of the Lovington Paddock Pool. There are no producing Lovington Paddock wells to the northwest of the proposed location and little control on the Paddock formation in that direction.

There is a significant risk that the porosity and permeability at the target horizon could be pinched out at the proposed location.

Q Have there been any dry holes drilled in the quarter section we're looking at?

A Okay. Now shown on the map but approximately 60 feet east of the proposed location there is a dry hole to the San Andres, which would effectively eliminate one of the more promising back-up zones in this immediate area.

Q While we're talking about the proposed location, Mr. Scott, is there a variance between the proposed location as set out in the application and the proposed location which we're talking about here today?

| _  |  |
|----|--|
| 1  | 11   |
| 2  | A Yes. This location was moved approxi-                      |
| 3  | mately 65 feet to the west due to the proximity of that dry  |
| 4  | hole and railraod tracks run right through the middle of it. |
| 5  | Q But it continues to be a standard loca-                    |
|    | tion for the Paddock formation.                              |
| 6  | A That is correct.   |
| 7  | Q Referring you to Exhibit One, can you id-                  |
| 8  | entify for the Examiner the and explain what the well        |
| 9  | symbols are that are shown as triangles on there?            |
| 10 | A Okay, the well symbols shown as triangles                  |
| 11 | are water injection wells in the Lovington Paddock Pool.     |
| 12 | Q How many of those are directly offsetting                  |
| 13 | the proposed location?                                       |
|    | A There are no direct offsets but there are                  |
| 14 | two diagonal offsets to the proposed location.               |
| 15 | These would increase the risk somewhat                       |
| 16 | from a standpoint of the proposed location possibly being    |
| 17 | watered out.   |
| 18 | Q Based on your testimony, do you have an                    |
| 19 | cpinion that a 200 percent risk factor is reasonable in this |
| 20 | case?  |
| 21 | A I believe it is.   |
| 22 | Q Are you also seeking drilling and super-                   |
|    | vision rates of \$300 a day?                                 |
| 23 | A Drilling and supervisionr rates are being                  |
| 24 | requested \$300 per day; management fees once the well is on |
| 25 | production are requested at \$350 per month.                 |

MR. STOGNER: Please continue.

25

| 1  |                     | 1 4  |
|----|---------------------|--|
| 2  | Q                   | A dry hole. Are there any other San An-    |
| 3  | dres dry holes or a | any other San Andres producing wells?      |
| 4  | A                   | Okay, San Andres produces in the Loving-   |
| 5  | ton Field to the so | outh of the proposed location.             |
|    | Q                   | It appears that your main objective is     |
| 6  | the Paddock Pool.   |  |
| 7  | А                   | That is correct.                           |
| 8  | Q                   | Are you expecting to encounter any other   |
| 9  | oil producing strip | ngers between the surface and the Paddock? |
| 10 | A                   | There are there are no other producing     |
| 11 | horizons other than | an the San Andres in the immediate vicin-  |
| 12 | Lty.                |  |
| 13 | Q                   | Now going back to your overhead charges,   |
| 14 | if I understood     | you right, you are requesting \$300 a day  |
| 15 | while drilling?     |  |
| l  | А                   | That is correct.                           |
| 16 | Q                   | And \$350 a month while producing.         |
| 17 | А                   | That is correct.                           |
| 18 | Ω                   | Okay, I multiply that by 30 and I come up  |
| 19 |                     | for drilling. Is that not what you come    |
| 20 | up with?            |  |
| 21 | A                   | Yes, sir, that is correct.                 |
| 22 | Q                   | How deep are these wells in the Paddock    |
| 23 | Pool?               |  |
| 24 | A                   | 6300 feet.                                 |
|    | Q                   | Doesn't \$9000 a day seem a little exces-  |
| 25 | sive for a 6300-foo | ot well in this area?                      |

| 1  |                     | 15  |
|----|---------------------|---|
| 2  | Α                   | \$9000 a day?                             |
| 3  | Q                   | \$9000 a month, I'm sorry.                |
| 4  | A                   | Well, \$300 per day is a standard fee for |
| 5  | retroleum consulta  | nts during drilling and completion opera- |
| 6  | tions.              |   |
|    | Q                   | Has Lynx Petroleum Consultants been in    |
| 7  | here before compula | sory pooling anybody?                     |
| 8  | А                   | No, sir, we have not.                     |
| 9  | Q                   | Are you going back to your exhibits,      |
| 10 | they were, as I u   | nderstood, they weren't prepared by you,  |
| 11 | they were prepared  | by somebody else.                         |
| 12 | A                   | Exhibits Six through Eighteen were.       |
| 13 | Q                   | Exhibits Six through Eighteen.            |
| 14 | A                   | That is correct.                          |
|    | Q                   | Okay, this \$9000 a month figure, is that |
| 15 | Lynx' figure or is  | that Southern Union's figure?             |
| 16 | A                   | No, that is Lynx Petroleum's figure.      |
| 17 | Q                   | \$9000 a month is the highest amount I've |
| 18 | ever encountered    | being my short term here at the Oil       |
| 19 | Conservation Div    | ision, but I'll take that under           |
| 20 | consideration.      |   |
| 21 |                     | MR. STOGNER: I have no further            |
| 22 | questions of this   | witness.                                  |
| 23 |                     | Are there any other questions             |
|    | of Mr. Scott?       |   |
| 24 |                     |   |
| 25 |                     |   |

                       REDIRECT EXAMINATION
2
   BY MS. AUBREY:
3
             Q
                       Mr. Scott, will the granting of Lynx'
4
   application
                  protect correlative
                                            rights, promote
5
   conservation, and prevent waste?
6
             Α
                      I believe it would.
7
                                MS. AUBREY: I have no more
8
   questions of the witness.
9
                                MR. STOGNER: Is there anybody
    \epsilonlse that has any questions of Mr. Scott?
10
                                 If not, he may be excused.
11
                                 Is there anything further in
12
   Case Number 8341 this morning?
13
                                MS. AUBREY: I have nothing
14
    further.
15
                                MR. STOGNER: If not, this case
16
    will be taken under advisement.
17
                        (Hearing concluded.)
