Re: Amendment to Administrative Order SWD-272,
Case No. 8405

Dear Mr. Orozco:

It is important that you submit a list and a map showing the location of all wells you are currently taking disposal water from and all wells you have contracted to take water from in the near future. This information is necessary for me to complete an order for the above-referenced case. If this information is not sent to our office in a timely manner, it may be necessary to retract the verbal permission granted, allowing you to commence disposal operations. An official order is necessary so that you may continue operating.

If you have any questions, please call me at (505) 827-5807.

Sincerely,

Gilbert P. Quintana

Case 8405
one L. to R. L.

SUBJECT: Meador A SWD #1-G in 10-25-36

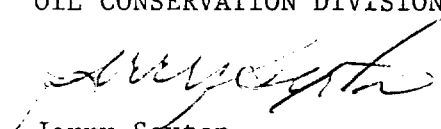

Dear Carmen:

The annulus pressure test of the above well was completed November 23, 1985, and the well appears to be mechanically sound as of this date. Also, the surface condition of the facility is satisfactory.

As provided by Division Order R-7935, approving this well for disposal, the District Supervisor has the authority to approve disposal of water other than that produced from the SR formation into the above referenced disposal well. You may consider this as approval for you to begin to accept water from leases other than those specified in Order R-7935.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I
