Case 8733

Attention David Catanach

Approval of Unorthodox
Well Location
Eddy County, New Mexico
EMCjr Corp - Spitfire "25" #1

Gentlemen:

Earle M. Craig, Jr. Corporation ("Craig") proposes to drill a 13,000' Wolfcamp test at a location 1,980' FNL and 1,580' FEL of Section 25, T-26-S, R-30-E, NMPM, Eddy County, New Mexico, which requires approval by the Commission under Rule 104F. We hereby request a hearing before the Oil Conservation Commission on the 23 October 1985 agenda, to obtain an order approving the proposed location.

The proposed 320-acre proration unit consists of N/2 of said section. Operators of proration or spacing units offsetting the proposed proration unit as shown on the attached plat have been notified by certified mail.

A concern that there may be archaeological artifacts at the standard location at 1,980' FNL and 1,980' FEL has prompted this request for the proposed non-standard location. Should the offset operators not enter an objection within 20 days of your receipt of this application, we respectfully request our application be granted approval administratively pursuant to Rule 104F II and III of Oil Conservation Division Rules and Regulations. Subsequently, we then would request our cause to be dismissed from 23 October 1985 agenda.

Your prompt consideration is appreciated.

Yours truly,

Steven R. Foy
Landman
