Re: Case No. 10,650, the Application of Mewbourne Oil  
Company for an Unorthodox Gas Well Location, Eddy  
County, New Mexico

Dear Mr. Stogner:

The above application was originally filed as a request for administrative approval. Enron Oil and Gas Company and Read & Stevens Inc. filed objections, and the matter was set for hearing on the January 7 docket. Enron and Read & Stevens have now waived objection, and copies of their waivers are attached hereto as Exhibits A and B. Attached as Exhibit C are waivers from other offsets. As a result, Mewbourne requests that the application be placed in line for administrative approval, so that a hearing is not needed. Until the application is approved administratively, we request that Case No. 10,650 be continued until the January 21 docket.

Mewbourne is anxious to commence drilling the subject well, and thus prompt consideration of the application is requested.

New Mexico Oil Conservation Division  
P. O. Box 2088  
Santa Fe, New Mexico 87504  
Attn: Division Director

Gentlemen:

Mewbourne Oil Company finds it necessary to apply for and receive administrative approval of an unorthodox location to drill an 11,600' Morrow well on its Loco Hills Prospect located in Section 2, T18S, R30E, Eddy County, New Mexico. A location of 990' FEL (nearest side boundary) and 990' FNL (nearest end boundary) in this section would give Mewbourne Oil Company the opportunity to encounter a sufficient amount of net Lower Morrow Sand porosity to make a commercial well.

Enclosed you will find a Lower Morrow Structure/Isopach map and Morrow Cross Section A-A'. The map shows our proposed unorthodox location with an open circle while a standard location is marked by an "X". As you can see from the Isopach map, the Lower Morrow Brown Sand identified on Cross Section A-A' has a greater likelihood of being thick enough to be productive in the northeast corner of this section. Conversely a standard location would not give Mewbourne Oil a reasonable chance to meet it's minimum thickness of 10' of porous sand needed to have a reasonable expectation of economic success.

The unorthodox location Mewbourne Oil seeks will be almost a mile from the nearest producing Morrow gas well, the Enron Oil and Gas Company Cedar Lake "35" Federal Com. #1 (location B, Section 35, 17S, 30E), which has just been drilled and completed this year. It is also moving away from and further updip in a structurally more favorable position than the other two Morrow penetration wells in Section 2.

Mewbourne Oil Company has notified the offset operators and

unleased mineral owners of our intention to apply for this  
unorthodox location.

Sincerely,

A handwritten signature in cursive script, appearing to read "Dexter Harmon".
