OIL CONSERVATION DIVISION

Application for Downhole Commingling  
Undesignated Gallup and Dakota  
Jicarilla Apache A-118 Lease  
Rio Arriba County, New Mexico

*Case 8295*

Amoco Production Company hereby makes application for an Order authorizing commingling Undesignated Gallup and Dakota production in its Jicarilla Apache A-118 No. 8, P-35-26N-3W, Rio Arriba County, New Mexico, and all wells subsequently to be drilled on this same lease which includes 2,560 acres in Sections 25, 26, 35 and 36-26N-3W.

Amoco Production Company is the owner of all Gallup and Dakota working interest rights under this lease and royalty is common. These zones are, or are expected to be, capable of low rates of production. The proposed commingling may result in the recovery of additional hydrocarbons from each of these formations, thereby preventing waste, and will not violate correlative rights.

In order to allocate the commingled production to each of the zones in the wells, we ask that the order allow Amoco to consult with the supervisor of the Aztec District Office of the Division to determine an allocation formula for any well downhole commingled under that order. We respectfully request this matter be set for hearing at the earliest possible date.

The attached Verification is a part of this application.
