Dear Sir:

With reference to your letter of September 9, 1986, it is true the pipelines were in the field the time that you question; however, these pipelines already in place were low pressure casinghead pipeline systems and were not suitable for gas line production.

A high pressure gas line was installed and connection made as the dates on the application note.

If we can be of further assistance, please do not hesitate to contact us.

Yours truly,

Alan W. Ralston

RE: Well head price ceiling
 determination, NGPA of
 1978

Gentlemen:

The New Mexico Oil Conservation Division has received your application for a wellhead price ceiling category determination under the sections(s) of the Natural Gas Policy Act of 1978 indicated below if your application is incomplete, forms are attached hereto, indicating the documents and further information which must be filed before your application can be considered. If your application is complete, it will be acted upon administratively unless written objection is received within 15 days of its filing.

WELL NAME AND LOCATION STATE E TRACT 17 1-17S-36E #5-P
 SECTION(S) APPLIED FOR 102(c)(1)(C)
 DATE APPLICATION RECEIVED June 17, 1986

APPLICATION INCOMPLETE *You answered no to the 1st question (was natural gas produced in commercial quantities from the reservoir prior to 4/20/77), if your information is correct, why then is the 3rd question negative. There were pipelines into this area as far back as 1964 taking gas from the Sunny well. Why wasn't a connection available to this well in 1976. ?* Sincerely,

DATE: Sept. 9, 1986

Michael S. Hogner
