Gentlemen:

The State Land Office records reflect that under Paragraph 8 of the Williams Agreement, which was approved by the Commissioner of Public Lands April 14, 1955, a first test well was spudded April 29, 1955, and, according to the Oil Conservation Commission Form No. C-103, this well was plugged and abandoned December 20, 1955. Paragraph 8 of the Williams Agreement provides " . . . Until a discovery of a deposit of unitized substances capable of being produced in paying quantities, Unit Operator shall continue drilling diligently one well at a time allowing not more than six months between the completion of one well and the beginning of the next well until a well capable of producing unitized substances in paying quantities is completed to the satisfaction of the Commissioner, . . ."

Therefore, the second test well should have been spudded, since no extension was given nor requested, six months after the plugging date of the first well, which was June 20, 1956.

Its being apparent from your letter of June 26, 1956, that you as Operator and the above listed joinders of this Unit wish this Unit terminated under its own terms.

Therefore, the Commissioner of Public Lands agrees to such termination and declares such Unit terminated as of June 20, 1956, and the State Land Office records will so reflect.

Very truly yours,

E. S. WALKER
Commissioner of Public Lands

Re: Williams Unit Agreement
Lea County, New Mexico

Sec. 8 & 17 T-16-S. R-34-B.

Dear Sir:

We acknowledge receipt of the above captioned Unit Agreement together with your remittance of \$10.00 being the amount of filing fee.

Please be advised that we have approved this Unit Agreement, effective April 14, 1955 and we enclose herewith your approved copies properly executed.

On February 16, 1955 we forwarded you our official receipt for the filing fee.

Very truly yours,

E. S. Walker

Mr. Johnny Walker, Land Commissioner
State Land Office
Santa Fe, New Mexico

Dear Mr. Walker:

C I wanted to give you a progress report on our Lucas & Aston
East Roswell Unit State #1 Well.

O This well was drilled to a depth of 135' with 16" hole
and on Monday February 28, 135' of 13 3/8" casing was set and
cemented with 37 sacks of cement.

P Mr. T. M. Thornton, who had contracted to drill the surface
hole, has moved out during shut-down time for cementing and
Mr. A. J. Smith of Smith Drilling Company has moved the large
Wichita Falls spudder in and will commence drilling following
completion of cementing shut-down.

Y I will submit a form C-103 showing the result of casing
shut-off.

Very truly yours,

FRANKLIN, ASTON & FAIR, Inc.

R. R. Aston
