Re: Orders R2954, R2953
& R2721

Dear Jim:

Commission Order R2721 authorized the institution of a pilot waterflood by Kewanee Oil Company in the Atoka Grayburg Pool. Injection was to be through the Leavitt No. 13 F, 13-18-26. This project was never begun. Subsequently, Commission Order R2953 established the Atoka Grayburg Unit in the area of the pilot program. Now, Commission Order R2954 has authorized a second waterflood in the unit with two different injection wells in Section 13-18-26. Are both R2954 and R2721 still in effect or does R2954 supersede the latter? Please clarify this matter for me.
