P
Dear Sir:

Reference is made to Commission Order No. R-3244, recently entered in Case No. 3587, approving the Antweil Malaga-Delaware Sand Water-flood Project.

Y
Injection is to be through the seven authorized water injection wells, each of which shall be equipped with a string of tubing and a packer, said packer being set within at least 50 feet of production casing shoe.

As to allowable, our calculations indicate that when the seven authorized injection wells have been placed on active injection, the maximum allowable which this project will be eligible to receive under the provisions of Rule 701-E-3 is 630 barrels per day when the Southeast normal unit allowable is 42 barrels or less.

Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the commission and the appropriate district proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned commission offices by letter of any change in the status of wells in the project area, i.e., when active injection

S. E. REYNOLDS
STATE ENGINEER

May 22, 1967

ADDRESS CORRESPONDENCE TO:
STATE CAPITOL
SANTA FE, NEW MEXICO 87501

Mr. A. L. Porter, Jr.
Secretary-Director
Oil Conservation Commission
Santa Fe, New Mexico

Dear Mr. Porter:

Reference is made to the application of Morris R. Antweil which seeks approval for a waterflood project in Sections 12 and 13, T. 24 S., R. 28 E., and Sections 7 and 18, T. 24 S., R. 29 E., which is docketed as Oil Conservation Commission case #3587.

No cement tops are given on any of the wells. It is suggested that the packers on the end of the tubing be set well below the top of cement surrounding the production casing on the 7 wells and that an adequate seal be provided between the 5½" casing and the 4½" liner in Well 9-2.

FEI/ma
cc-M. R. Antweil
F. H. Hennighausen

Yours truly,

S. E. Reynolds
State Engineer
