Post Office Box 10  
Roswell, New Mexico

O Dear Sir:

O Reference is made to Commission Order No. R-3265, entered in Case No. 3599 approving the Franklin, Aston & Fair Hudson Water-flood Project.

P Injection is to be through the two authorized water injection wells, each of which shall be equipped with a string of tubing and a packer, said packer being set as near to the casing shoe as is practicable. Where more than one zone is put on selective injection, injection will also be down the casing-tubing annulus. In the event produced water is injected, the tubing shall be plastic coated internally and injection of said produced water limited to the tubing.

Y As to allowable, our calculations indicate that when all of the authorized injection wells have been placed on active injection, the maximum allowable which this project will be eligible to receive under the provisions of Rule 701-E-3 is 182 barrels per day when the Southeast New Mexico Normal Unit Allowable is 42 barrels per day or less.

Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the Commission and the appropriate district proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned Commission offices by letter of any change

in the status of wells in the project area, i.e., when active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.

Your cooperation in keeping the Commission so informed as to the status of the project and the wells therein will be appreciated.

Very truly yours,

A. L. PORTER, Jr.  
Secretary-Director

Re: Franklin, Aston & Fair, Inc.  
Water Flood Project

Gentlemen:

On June 7, 1967 we mailed to you Application of Franklin, Aston & Fair, Inc. for authority to institute a water flood project. At that time we advised you that we would furnish diagrammatic sketches of the proposed injection wells. We now enclose in triplicate sketches of the Hudson No. 1 and the Hudson No. 5 proposed injection wells. Copies of these sketches are being furnished the New Mexico State Engineer and the United States Geological Survey.

Yours very truly,

HINKLE, BONDURANT & CHRISTY
