**Mr. A. J. Losee
Attorney at Law
Post Office Box 239
Artesia, New Mexico 88210**

C Dear Sir:

C Reference is made to Commission Order No. R-3841, recently entered in Case No. 4208, approving the John Yates Caroline Millman Waterflood Project and the John Yates Mary Lou Millman Waterflood Project.

O Injection into each projection shall be through the one authorized water injection well for that project. In both projects injection shall be through 2-inch tubing set in a packer at about 1050 feet. The casing-tubing annulus in each well shall be loaded with an inert fluid and equipped with a pressure gauge at the surface.

P As to allowable, our calculations indicate that when both of the authorized injection wells have been placed on active injection, the maximum allowable which the Caroline will be eligible to receive under the provisions of Rule 701-E-3 is 168 barrels per day when the Southeast New Mexico normal unit allowable is 42 barrels per day or less and the maximum for the Mary Lou project is 112 barrels per day.

Y Please report any error in these calculated maximum allowables immediately, both to the Santa Fe office of the Commission and the appropriate district proration office.

In order that the allowable assigned to the projects may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned Commission offices by letter of any change in the status of wells in the project areas, i.e., when

active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.

Your cooperation in keeping the Commission so informed as to the status of the projects and the wells therein will be appreciated.

Very truly yours,

E. Millman, Seven Rvrs
Sec 29, T 19 S., R. 28 E.

Cumulative water injection 83455. No water injection for several months. Tentative plans were to plug and abandon well. However, due to having recently drilled new well in vicinity, operator of Mary Lou 1 is waiting to evaluate results and decide whether or not to plug and abandon same.

Hence, operator is discontinuing monthly water injection reports.

Production Clk.

Submitted in triplicate

Project abandoned
