Request for Extension of Time to Commence Well Under Order No. R-9196

Dear Mr. Lemay:

The above order was entered in Case No. 9926, the Application of Mewbourne Oil Company for Compulsory Pooling and an Unorthodox Gas Well Location, Eddy County, New Mexico (Mewbourne's Fed. "S" Well No. 1). The order provides that Mewbourne shall commence the well on or before September 1, 1990.

Mewbourne is currently drilling its Fed. "T" Well No. 1 on nearby acreage, and intends to move the drilling rig from that well to the Fed. "S" Well No. 1 location. However, due to lost circulation in the Fed. "T" Well No. 1, Mewbourne may be unable to move the rig and commence the Fed. "S" Well No. 1 until after September 1, 1990.

Therefore, respectfully requests Mewbourne that commencement deadline in Order No. R-9196 be extended to September 30, 1990.

Thank you for your consideration of this matter.

RE: Application for Unorthodox Drilling Permit Red Lake Atoka Morrow Federal "S" #1 Well N/2 of Section 21, T18S-R27E, Eddy County, New Mexico

Ladies & Gentlemen:

Mewbourne Oil Company proposes to drill the Federal "S" #1 well at a location 660 feet from the east line and 660 feet from the north line of Section 21, T18S, R27E, Eddy County, New Mexico as a 9,900' Morrow test well. The pool rules for the Red Lake Atoka Morrow Pool are 1980 feet from the nearest end boundary and 660 feet from the nearest side boundary (statewide pool rules). According to the New Mexico Oil Conservation Division's rule 104 C. II (a), permission to drill the Federal "S" #1 well at the proposed location requires notice and hearing.

Mewbourne wishes to drill this well at the proposed location because we feel it is necessary if we are to recover oil and gas reserves underlying our lease. We are also convinced that the distance from the proposed well location to other producing wells in the area is sufficient to insure no harmful effect on other producers.

If you have no objection to the proposed location, please date and execute the attached Waivers of Objection and return two (2) executed copies to us in the enclosed self-addressed envelope. Should you have any questions regarding the above or want to discuss this matter further, please call. Your prompt and favorable response will be sincerely appreciated.

Sincerely,

MEWBOURNE, OIL COMPANY

Attention: Mr. Richard Moore

RE: T18S, R27E
Section 21: E/2NE/4, for all depths from the base of the Abo formation to the top of the Mississippian formation

Eddy County, New Mexico

Gentlemen:

For reference, Mewbourne owns the Federal lease covering the NW/4NE/4, N/2NW/4 and the SW/4NW/4 of the captioned Section 21. County records indicate you own a leasehold interest under the captioned land. As proposed to the other leasehold owners, Mewbourne Oil Company desires to drill a Morrow test well in the NE/4NE/4 of the captioned Section 21, with the drilling and spacing unit comprising the N/2 of said Section 21. Accordingly, Mewbourne Oil Company hereby requests a farmout of your operating rights under the above land subject to the following terms:

- 1) Subject to Drilling Permit approval by the New Mexico Oil Conservation Division, Mewbourne as operator, will commence within 120 days from the date of your executed farmout agreement a test well at a location 660' FNL & 660' FEL of the captioned Section 21 and drill same to a depth sufficient to test the Morrow formation estimated to be approximately 9,900 feet subsurface, with the drilling and spacing unit comprising the N/2 of said Section 21.
- 2) By drilling and completing the test well as a commercial producer, Mewbourne would earn an assignment of your operating rights in the captioned land to 100 feet below the total depth drilled in the test well.
- 3) You would retain in addition to the deep rights, an overrading royalty interest equal to the difference between 25% of all oil and gas that might be produced and the total of all royalty interests, overriding royalty interests and other burdens or lawful claims upon production which the captioned land may be

subject, to the extent that Mewbourne shall be assigned a 75% net revenue interest lease under the above described land. At payout of the above described test well, you would have the option to convert your override to a 25% working interest. The interests set out in this paragraph are to be proportionately reduced to the interest actually owned by you in the proration unit attributable to the test well described above.

4) Upon acceptance of the farmout proposal by your company, you agree to furnish Mewbourne with copies of the leases, title opinions and any applicable gas contract associated with the captioned land.

Alternatively, Mewbourne Oil Company hereby invites you to join in the drilling and completion of the above described test well. Enclosed for your approval in this connection is an AFE.

In the event you agree to join in the drilling and completion of the above described test well, you agree to enter into a joint operating agreement with Mewbourne on the AAPL Form 610-1982 Model Form Operating Agreement naming Mewbourne Oil Company as Operator.

As the N/2 of the captioned Section 21 could be experiencing drainage from offset wells in Mewbourne's opinion, time is of the essence in drilling the proposed test well. Your early decision regarding the above will be greatly appreciated.

Sincerely,

MEWBOURNE OIL COMPANY
