Gentlemen:

This letter will serve as Maralo Inc.'s formal request for a farmout of Texaco's leasehold interest in the captioned acreage. The following terms and conditions are requested for a farmout:

1. Maralo will drill or cause to be drilled a test well to adequately test the Morrow formation at a depth of approximately 14,800' on or before June 30, 1994 at a legal location in the SW/4 NE/4 of Section 30, T-23-S, R-30-E, NMPM, Eddy County, New Mexico. Said well's proration unit shall be a communitized N/2 of Section 30, which includes a portion of the captioned farmout lands.
2. Upon establishment of commercial production from said well, Maralo proposes to earn the following:
 - a. One hundred percent (100%) of Texaco's leasehold interest in the NW/4 of said Section 30, and seventy-five percent (75%) of Texaco's leasehold interest in the remainder of the captioned acreage, with Texaco delivering Maralo an eighty percent (80%) Net Revenue Interest Lease.
 - b. After payout of the costs of said well, Texaco shall have a one-time option to convert said reserved ORRI to a twenty-five percent (25%) working interest in said well and its proration unit, proportionately reduced.
3. In the event the drilling of said well results in a dry hole, and no acreage is earned, Maralo will have the option to drill a similar test on the captioned farmout acreage, within one hundred eighty (180) days of the plugging of the initial well. If the drilling of said second well results in the establishment of commercial production, Maralo shall earn the same interest outlined above.

Texaco Exploration and Production Inc.

Page -2-

4. All rights earned by Maralo shall be limited in depth from the surface down to one hundred feet (100') below the deepest perforation in said well made by Maralo.

5. In order for Maralo to maintain its earned acreage outside of the proration unit established for the initial test well, Maralo must commence a continuous development program which would allow no more than one hundred eighty (180) days to elapse between the completion or plugging of the previous well and the commencement of actual drilling operations on the next succeeding well.

6. There shall be no obligation upon Maralo to commence operations on said well pursuant to the terms of the formal agreement, and the only penalty for failure to commence said operations will be the forfeiture of all rights that might be earned by said operations.

We have also enclosed herein for Texaco's review and possible execution two copies of Maralo's AFE to drill the Gold Rush "30" Fed Com #1 well. If Texaco desires to participate in this well instead of farming out its interest as detailed herein, please execute said AFE at your earliest convenience.

Please advise as soon as possible if the foregoing terms meet with your approval and begin preparation of a formal agreement. Should you have any questions concerning this request, please feel free to contact the undersigned.

Yours very truly,

Mark Wheeler, CPL
District Landman
