LAND OFFICE

The Honorable Commissioner of Public Lands  
of the State of New Mexico

The State of New Mexico Oil Conservation Commission

Stanolind Oil and Gas Company as Unit Operator and in its own behalf as owner of over seventy-five percent (75%), on an acreage basis, of the working interests signatory to the Guadalupe Foothills Unit Agreement, Sec. No. 951, hereby respectfully requests approval of the Director, the Commissioner and the Commission to the immediate termination of said agreement, pursuant to Section 20 thereof.

In support of this Application for Termination, the following is respectfully submitted.

1. Pursuant to Section 9 of said Unit Agreement, the Guadalupe Unit Well #1 was spudded on November 29, 1952, at a location 660' from the south line and 2160' from the east line of Section 20, Township 22 South, Range 25 East, Eddy County, New Mexico, and drilled to a total depth of 13,034 feet at a cost of \$391,529. The well was completed as a dry hole and abandoned on August 10, 1953.

2. Elevation of the derrick floor was 3964', and various formations were tested without encountering commercial oil or gas showings, as follows:

Delaware Sand Top 2050'	2 tests; no show of gas or oil
Bone Springs Top 4445'	4 tests; est. 50 MCFD. 4500-4567'
Wolfcamp Top 7935'	1 test; gas volume too small to measure
Pennsylvanian Top 8700'	3 tests; est. 8 MCFD. 10,680-10,742'
Siluro-Devonian (Fusselman) Top 11,325'	2 tests; no show of oil or gas
Ellenberger Top 12,535'	3 tests; no show of oil or gas

The undersigned believes that it is reasonably determined that the unitized land is incapable of production of unitized substances in paying quantities in the formations tested, and it and the other working interest owners in the unit have been unwilling to incur the expense and risk of drilling any additional wells. We have been unsuccessful in attempts to interest other parties in drilling another well on a farmout basis.

Dated this 4 day of May, 1955.
