

Case 2755

Heard 2-21-63

Rec. 2-26-63

1. Grant permission to begin a water flood project in the High Lanesome - Penrose oil pool.

2. Grant the use of ~~the~~ certain wells to be used as injection wells as follows:

(a) The wells listed on the application for stages I + II shall be approved for injection wells for either the peripheral or pattern flood.

(b) The wells listed as III stage peripheral flood wells shall be approved for injection wells only if the peripheral pattern is used.

(c) The wells listed as injection wells if the pattern is changed to a "pattern" flood shall be approved only if the pattern flood is to be used by the applicant.

3. Rule 701 shall regulate the production of oil from this flood.

4. Usual No flood order otherwise.

Thos. H. H.

5. Water shall be injected thru tubing & below a packer set in the lower part of the production casing.
