13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

EOG Resources requests permission to surface pool/lease commingle production from this well and future wells at a central tank battery from the following federal lease: NMNM-66927.  
Wells involved are :

- Ruby 2 Fed Com 702H 30-025-43892 (96658) Hardin Tank; Wolfcamp
- Ruby 2 Fed Com 703H 30-025-43893 (96658) Hardin Tank; Wolfcamp
- Ruby 2 Fed Com 704H 30-025-43894 (96658) Hardin Tank; Wolfcamp
- Ruby 2 Fed Com 705H 30-025-43895 (96658) Hardin Tank; Wolfcamp

Commingling details attached.

Concurrent application filed with NMOCD an NMSLO.

14. I hereby certify that the foregoing is true and correct.

\* projected; pending completion

**GENERAL INFORMATION:**

- Federal Lease NMNM 66927 covers 2,480 acres, being all of sections 4 & 9, the W2NE, SENE, W2, SE section 3 and the N2, SW, NESE, W2SE section 11, in Township 26 South, Range 34 East, Lea County, New Mexico.
- State lease VB-1820-1 covers 320 acres, being the N2 of section 2 in Township 26 South, Range 34 East, Lea County, New Mexico.
- State lease VB-1821-1 covers 320 acres, being the S2 of section 2 in Township 26 South, Range 34 East, Lea County, New Mexico.
- The W2NW-2 of VB-1820-1, W2SW-2 of VB-1821-1, and the W2W2-11 of NM 66927 will be communitized for the Wolfcamp formation. A State/Fed form of communitization will be submitted to both the New Mexico State Land Office and Bureau of Land Management for approval.
- The E2NW-2 of VB-1820-1, E2SW-2 of VB-1821-1, and the E2W2-11 of NM 66927 will be communitized for the Wolfcamp formation. A State/Fed form of communitization will be submitted to both the New Mexico State Land Office and Bureau of Land Management for approval.
- The W2NE-2 of VB-1820-1, W2SE-2 of VB-1821-1, and the W2E2-11 of NM 66927 will be communitized for the Wolfcamp formation. A State/Fed form of communitization will be submitted to both the New Mexico State Land Office and Bureau of Land Management for approval.
- The central tank battery to service the subject wells is located in the SESW of section 2-26S-34E.
- Ownership of all of the subject wells is identical (see landman statement attached).
- An application to commingle production from the subject wells is being submitted to the NMSLO, BLM and the NMOCD.
- Enclosed herewith is (1) a map that displays the leases, the location of the subject wells, and the proposed CTB, (2) a process flow diagram, and (3) the C-102 plat for each of the wells.

### **Process and Flow Descriptions:**

The production from each well will flow into a dedicated 3-phase separator. The production stream will be separated into 3 independent streams (gas, oil, and water) by the separator and each stream will be measured individually after it exits the separator. The gas will be measured using a senior orifice meter and used to allocate total volume measured at the facility check meter, high pressure flare meter, and low pressure flare meter.

RUBY 2 FEDERAL COM #702H gas allocation meter is an Emerson orifice meter

RUBY 2 FEDERAL COM #703H gas allocation meter is an Emerson orifice meter

RUBY 2 FEDERAL COM #704H gas allocation meter is an Emerson orifice meter

RUBY 2 FEDERAL COM #705H gas allocation meter is an Emerson orifice meter

The oil from the separators will be measured using a Coriolis meter.

RUBY 2 FEDERAL COM #702H oil allocation meter is a FMC Coriolis meter

RUBY 2 FEDERAL COM #703H oil allocation meter is a FMC Coriolis meter

RUBY 2 FEDERAL COM #704H oil allocation meter is a FMC Coriolis meter

RUBY 2 FEDERAL COM #705H oil allocation meter is a FMC Coriolis meter

The water will be measured using a vortex meter. The water from each separator is combined in a common header and flows into (4) 500 barrel coated steel tanks. Guided wave radar is used to measure water volumes in these tanks. The oil from each separator will be combined into a common header and flow into a heated horizontal separator (HHS) to aid separation of water entrained in the oil. Water from the heated separator flows into the common water header connected to the (4) 500 barrel water tanks. The water is then pumped and/or trucked to a salt water disposal well. The oil from the heated separator flows through a vapor recovery tower (VRT) where gas is allowed to breakout at a lower pressure, and then the oil flows into (8) 500 barrel coated steel tanks. Guided wave radar is used to measure water and oil volumes in these tanks. Oil is pumped out of the tanks through a Coriolis meter into a truck or a pipeline. Every tank utilizes a guided wave radar to determine the volume of product in each. After the gas from each separator is measured it is combined into a common header. The gas from the heated separator also flows into this header. The gas flows through the header to a custody transfer Emerson orifice meter that serves as our lease production meter. If the pipeline is experiencing problems and cannot take any gas, the gas will flow through the high pressure and low pressure flare meters to the flare. The overhead gas from the vapor recovery tower is compressed by a vapor recovery compressor and then measured by a custody transfer Emerson orifice meter. The gas from the vapor recovery system combines with the gas from the lease production meter and flows into our gas gathering pipeline system.

\*Meter numbers will be provided upon installation of meters and completion of the facility.
