

OIL CONSERVATION COMMISSION

P. O. BOX 871

SANTA FE, NEW MEXICO

-2-

March 23, 1961

Mr. William C. Briggs  
Rodey, Dickason, Sloan, Akin & Robb  
Attorneys at Law  
First National Bank Building  
Albuquerque, New Mexico

four inches in diameter should be set as a marker  
in the top of the cement and should extend four  
feet above the surface of the terrain.

Mr. James E. Kapteina, District Engineer for the  
Oil Conservation Commission, Santa Fe, New Mexico, will  
witness the plugging of these wells and must be notified at  
least 48 hours before commencement of operations.

The Commission has given the defendant herein  
ample opportunity to plug these wells or to see to it that  
the principals plug them. While our sympathies are with  
the surety company in a case of this nature, nevertheless  
in the interest of conservation the wells must be plugged,  
even if the surety finds it distasteful to do so. For  
these reasons we earnestly request your cooperation in  
having these wells plugged as soon as possible. This  
office will be glad to cooperate in any way.

Very truly yours,

RICHARD S. MORRIS  
Attorney
