RE: Farr Well No. 1
G-6-T31N - R34E
Union County, NM

Dear Mr. Pack:

Enclosed are the appropriate forms to be completed for officially transferring a well permitted as an oil/gas test to the landowner for use as a water supply well. Two copies - one of which must be an original - are required by this office. If other copies, showing the State's approval, are desired for operator and/or landowner, such additional forms should also be completed and forwarded with handling instructions.

In addition to the foregoing, please clarify the hole and casing conditions with a corrected C-103 form. The C-103 dated August 12, 1981 shows 8 5/8" casing set at 350' but the amount of cement used on that casing string is not reported. Also that report indicates 100' of cement at 680' to 580'. Kindly compare this information with your Forms C-103 and C-105 dated October 25, 1981. The discrepancies are obvious.

If transfer of ownership in the subject matter is properly expedited, Case 7396 - scheduled for hearing on December 2, 1981 - may be cancelled.

Yours truly,

Carl Ulvog,
Supervisor District IV
