Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

RECEIVED

By OCD; Dr. Oberding at 11:38 am, Mar 06, 2015

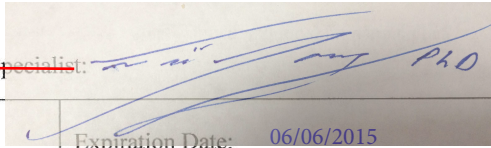

Describe Cause of Problem and Remedial Action Taken.*

Leak in 2 3/8 fiberglass injection line on upset of tubing. Initially dug out area where leak occurred. Put temporary repair clamp on line and left area uncovered for NMOCD field inspector to look at.

Describe Area Affected and Cleanup Action Taken.*

Sandy loam

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

E-mail Address: rskinner@gwdc.com	Conditions of Approval:	Attached <input type="checkbox"/>
Date: 3/6/2015 Phone: 575-942-1294	Site samples required. Delineate and remediate area as per NMOCD guides.	<u>1RP-3560</u> <u>9338</u>

* Attach Additional Sheets If Necessary

In addition groundwater samples must be provided at the site. The depth to groundwater on OCD records is 50'-100' bgs; based on the admitted historic releases in this area, which were not reported/ remediated, there is a statistically significant chance for groundwater impact at this location. The historic releases must also be addressed.
