Subject: Closures of Remediation Projects – No Further Action

<u>Re:</u>	<u>3RP #</u>	<u>Site Name</u>
	411	GCU 093
	441	GCU 169E

Mr. Moskal:

I have reviewed the files on the releases referenced above. The available information indicates BP has met the requirements of 19.15.29-30 NMAC. No further corrective actions are required. These referenced remediation projects are closed.

This finding by the OCD does not relieve BP of responsibility if future information shows a threat to ground water, surface water, human health, or the environment. Further, it does not relieve BP of responsibility for compliance with any federal, state, or local law.

We looked at OCD Online files for 3RP-465 Archuleta GC A 004. The information seemed incomplete and there was no narrative to tell us what happened. Do you have any more information?

Please plug remaining monitoring wells per requirements of the New Mexico Office of the State Engineer. Thanks.

Respectfully,

P.E., Hydrologist, District III
