Re: 3RP-134 VALDEZ A #1E
2018 Annual Groundwater Report and Request for No Further Action
November 30, 2017

Dear Ms. Ager:

OCD has reviewed the referenced report and request for NFA. The OCD response follows.

Prior to our NFA decision, OCD requires confirmatory groundwater monitoring data.

Please install a temporary monitoring well near MW8 which had been removed. Take groundwater samples and have them analyzed using EPA Method 8260 for the full range of hydrocarbons.

QAQC should include at least one blind field duplicate and a one lab spilt.

Provide District III staff with a schedule or your proposed work and at least 72 hours prior notice of major activities in the schedule so that staff can witness activities.

Regards,

Randolph Bayliss, P.E.
Hydrologist, District III

Cory Smith
Environmental Specialist, District III
