## ***Public Notice Display Ad: (Lovington, NM "Leader")***

Legal notification for 3"x4" newspaper display add per Water Quality Control Commission Regulations 20.6.2.3.108.8.4 NMAC

Wasserhund Inc., P.O. Box 2140 Lovington, New Mexico 88260, Larry Gandy, has filed a permit renewal application with the New Mexico Oil Conservation Division (OCD) to renew the operating permit for a class III brine well for its existing brine and fresh water station previously permitted by the OCD as BW-22.

This site is located in the SW/4, SW/4 of Section 20, Township 12 South, Range 36 East, NMPM, Lea County, New Mexico, approximately one miles west on Highway 380 from the intersection of Hwy 18 and Hwy 380.

Fresh water is injected into the Salado salt formation at a depth ranging from 2165 to 2830 feet below the surface to produce brine water. The site produces approximately 200-300 barrels of brine water per month.

Ground water in this area is approximately 30 feet below the ground surface and has a total dissolved solid content of 600-700 mg/l.

This facility is designed and operated to have no intentional water contaminants discharged to the surface or subsurface for the protection of groundwater. The system has load containment devices to prevent any spills or leaks from reaching the ground surface during operations.

If you have any questions or concerns please do not hesitate to contact Wasserhund Inc. at the address above or you may contact Wayne Price 505-715-2809 or E-mail [wayneprice@q.com](mailto:wayneprice@q.com). Wasserhund Inc. welcomes your input.

The New Mexico Oil Conservation Division (OCD) will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Interested persons may contact Jim Griswold, Oil Conservation Division (OCD) 505-476-3465 or by writing 1220 South Saint Francis, Santa Fe, New Mexico, 87505.
